I have sighted the above building consent and believe, on reasonable grounds, that the solid fuel heating appliance has been installed as per the above building consent and the heater manufacturer's instructions. On existing chimneys, it has been inspected for cracks and bonding to the brick fascia and any repairs necessary have been made.

I understand that Council will rely upon this producer statement, for the purpose of establishing compliance with the above building consent. This PS3 needs to be accompanied by supporting documents; for example, reports and site photos to help support the PS3.
