Feedback

1.1 Local Community
Taupō

1.3 Next 10 Years
Yes

1.3.1 if yes

this question doesnt make sense your asking us 3 questions with only 1 yes no answer. Just i definitely think focusing on the essentials

the roads we already have need to be looked after no need for upgrades and fixing problems thats arnt there no need for adding in more lights when roundabout will do the trick and housing is a madsive problem here not only are the locals short of home but with mytiple people moving here every week this takes homes away from our locals

the cost of living is horrendous and multiple people are contemplating selling there homes and dont have anywhere else to go so keeping this in mind maybe avoid foing any big projects so single mums can get back on there feet

1.4 Tūrangi Wastewater
Disagree

1.4.1 Disagree
Disagree

Is there anything else you would like to tell us about this issue?

there is no point spending money for a short term solution skip this process save money in the long run and sort something out

1.5 Taupō North Wastewater

Disagree

1.5.1 Disagree

Disagree

Is there anything else you would like to tell us about this issue?

i think a good option to invest in is cleaning our waste water and re using this water to flush toilets clean cars irrigation etc why do we need to store more wastewater when we can find alternative ways of using the waste instead of creating more waste

1.6 Bag it or Bin it

Agree

1.6.4 Agree

yes i agree that a bin system will be good it helps keep our streets cleaner although i dont think the bins should be put on rate payers people pay for there own rubbish bags now so i believe they can pay for there own bins to save themselves money in the future this will also make people look after there bins better and also its a good idea to offer a service to help people with there bins but i believe that this is not necessary as people that are unable to do this themselves often have family living in the house who can do it or have carers coming to visit them in there homes that can also help with this, they are already doing bags so why would something on wheels be any harder?

1.7 Housing

Agree

1.7.3 Agree

housing is needed in taupo these homes need to be offered to locals first in, although keeping in mind that people can only borrow up to 6x there income with alot of people only being \$312,000 maybe partnering with kainga ora or the new housing initiative

1.8 Development Contributions

Yes

Is there anything else you would like to tell us about this strategy?

work with maori not against them the land is there and maybe by making it easier for them to do stuff on the land will benefit taupo as a whole

1.9 Community Funding

Yes

Please explain why you agree or disagree with these changes.

1.9.1 Community Q2

Yes

Please explain why you support or do not support the proposed eligibility and assessment framework.

1.10 Waste management and Minimisation Plan

Yes

Is there anything else you would like to tell us about this plan?

yes other than the comments made earlier, i also seen the mention of minimising the use of single use items for example coffee cups, i believe that shop owners should be taxed or charged a little bit for the collection of these bins especially when they are overloaded with there food packaging!

1.11 Any other feedback?

taupo council need to avoid putting extra stress on rate payers and try to find funding elsewhere, start investing and reaching out to the community and watch us come together and work as a team, i can also tell you guys that you get ripped off by alot of business owners who put up there quotes just because its council do your research get multiple quotes and challenge them

Do lots less

What do you think we should do more or less of (be specific)?

we do not need money spent on climate change . This is a total waste of our rates .

Sating our rates go towards fixing the roads is not true as we pay alot of petrol - diesel - car registration costs etc that claims it all goes to the roads so why up our rates go up to pay for things we already pay for ,

Patks amd reserves are not always maintained now so to claim that we need to pay mote rates over the next 10 years to keep this up is a joke .

The reserve around our areas are seldom mowed and wven when they are (every 2 to 3 nonths) they are nit fully mowed in the areas that are supposedly owned by you .

Also the rate of the money that is distributed or goven to Tuwharetoa is beyond imaginable. 1 mullion dollars for a bulding for a 25 year contract is unacceptable and not once were we consukted as ratepayers .

You as councils need to stop the erratic spending and maybe propose pay cuts to help ease the cost rather than squeezing every last penny out of us homeowners.

1.4 Tūrangi Wastewater
Strongly Disagree

1.4.2 Strongly Disagree
Strongly Disagree

Is there anything else you would like to tell us about this issue?

Is there anything else you would like to tell us about this issue?
Although there are downsides to bags, they also incentivise you to be more mindful of your wastage and to minimise what you throw out. Our household tends to only fill a bag every month or so as we make a concerted effort to minimise our waste. We also have nowhere to store a massive wheelie bin on our property. We would be much worse off with the wheelie bin scheme.

1.10 Waste management and Minimisation Plan
Yes

Is there anything else you would like to tell us about this plan?
With the cost of building materials being so high, I imagine there'd be plenty of people interested in reusing recovered building material (such as 2x4 framing) if such a program could be rolled out. There's so much wastage in the building industry, it seems a good target to address. My brother-in-law is a builder and rescues all the offcuts of untreated cedar from his building sites so the whole whanau has good kindling over the winter. Small things like that can make a big difference to waste minimisation (and helps keep the whanau warm at no extra cost).

1.7.1 Disagree Disagree

Is there anything else you would like to tell us about this issue?

the council is neither a building partner nor would it know all the ins and out of being so. stick to what you know if there is such a thing

1.8 Development Contributions No

Is there anything else you would like to tell us about this strategy? get on with basic services nothing else

1.9 Community Funding No

Please explain why you agree or disagree with these changes. stop wasting ratepayers money, full stop.

1.9.1 Community Q2 No

Please explain why you support or do not support the proposed eligibility and assessment framework.

what answer do you want.

1.10 Waste management and Minimisation Plan No

Is there anything else you would like to tell us about this plan?

this survey is starting to get too complicated to answer as i require, the councils mind is probably made up anyway as per usual

1.11 Any other feedback?

leave things alone that are not broken most of the ideas are a total waste of time and money. i have lived in taupo just on fifty years and and have seen it all before, i.e. go through the the motions of informing the ratepayers what you think they might want to hear, let things go quiet for a while and then do what you were going to do from the start anyway. how much money was wasted setting up this survey which could have been better spent on proper needs around the town.

No

1.3.2 If no
Do less

What do you think we should do more or less of (be specific)?

The change to kerbside rubbish collection does not need changing in this plan. Focus on what NEEDS to be done not what appeases a small percentage of the population. Taupo has a large ageing population who struggle with wheelie bins. Houses are being built on smaller lots making storage a nuisance. Who pays to replace when the local youths burn them. Check out the problems experienced overseas

1.4 Tūrangi Wastewater
Agree

1.5 Taupō North Wastewater
Agree

1.6 Bag it or Bin it
Strongly Disagree

1.6.2 Strongly Disagree
Strongly Agree

Is there anything else you would like to tell us about this issue?

The bins are a bloody nightmare to drag up and down drives. Who pays when they have been stolen and burnt. Who pays when an empty one ends up hitting a vehicle. The bag system works and is fair. You pay for what you use. Focus on what we NEED to do. Having said that knowing TDC you have made up your mind and signed the contract

1.7 Housing Disagree

1.7.1 Disagree Agree

Is there anything else you would like to tell us about this issue?

The days of councils funding is over. Arrange for othwr developers to build. Get lwi involved. If less than 50% are protected its not enough.

The vision of TDC is not shared by everyone

1.10 Waste management and Minimisation Plan No

Is there anything else you would like to tell us about this plan?

1.11 Any other feedback?

Stick to essentials and needs. Leave wants for when the economy has recovered. TDC has wasted enough money and the proposed rate increase is one that I wont be able to afford. The cap for rates refuction hasnt increased so I along with many will cut back further and further to a point life in Taupo becomes unsustainable. You wanted us to be the queenstown of North Island without realising the town cant afford that. We have no growth in healthcare yet our rates are that of a town that has amazing infrastructure. More shops in town are becoming empty, crime is on the increase, mental health and addiction issues are on the increase. All signs of an area struggling.

Keep the status quo and forget the food waste option completely. I strongly disagree with the concept of filthy wheelie bin rubbish collections. I've seen it operate in Auckland and it's a filthy, unhealthy and costly disaster. I can only think the council is proposing the use of wheelie bins because someone has had their palm greased. ie follow the money.

why can't the wheelie bins be optional? There are only two in my household and I won't full them as quickly as a family. I'm struggling as it is I don't want my rates going up. I have more recycling than landfill and 1 small bag of rubbish per fortnight does not need a wheelie bin.

Taupo is in desperate need for another high school, private or semi private. Based on our current primary school, at least 30% of parents have already preenrolled their children into a boarding school in future. Its a shame for these children to be leaving the area or families moving to a different area to access a more suitable public high school. Apparently there is no where that has been future zoned for another high school and i think this should be looked into

Can a mixed solution be implemented. Omori/Kuratau and other areas with predominantly holiday homes are better suited to having bag collection so that bins aren't left out for weeks to blow around.

as a home owner who is a temporary resident pay as you go is the preferred option. Wheelie bins collected on a specific day don't provide flexibility. A resident has to be onsite to retrieve the bin after it's emptied and this is impractical. Bags allow residents who holiday in Taupo the flexibility to put bags out prior to collection day, and don't need to do anything further after collection. A wheelie bin requires physical retrieval of the bin post collection.

while bins are good, it may mean people put their rubbish in other owners bins or street bins to get around not being able to bring their own bin in because they've left Taupo

1.5 Taupō North Wastewater
Agree

1.6 Bag it or Bin it
Strongly Disagree

1.6.2 Strongly Disagree
Strongly Agree

Is there anything else you would like to tell us about this issue?

Bins sound like a good idea but they very impractical for many people. Personally it would be a nightmare for my house because I live down a steep driveway and I also have nowhere to store all these bins. That means not only do I have to magically find space somewhere but I also have to hike the bins up and down my very steep driveway. I can't imagine how my elderly neighbours would do this. I also live down a driveway with 7 properties and we don't have kerbside space for 7 households worth of bins. We would have to put them outside someone elses house.

They also get easily blown over in windy or winter weather and then everyones rubbish is on the road. Please stick with the bags or give us an option to have a combination of bags and bins so each person can do what works best.

if you are introducing wheelie bins suggest that you have to purchase a rubbish label for collection as in Auckland. A lot of holiday homes etc in Taupo and shouldn't all have to pay for collection if bin isn't being used. I already get charged double rates on my property as it has a kitchen sink... whereas a neighbour with an air bnb and and kitchenette doesn't pay extra... yet they still have a laundry tub used as a kitchen sink..

Pay as you go does drive people to manage level of waste v recycling

Properties which generate low levels of rubbish would pay more and be subsidising larger generators under the proposed plan

For rentals, pay as you go, means the cost is direct to tenants rather than a cost to landlord then to rents. Low rubbish generating tenants would effectively be paying more and subsidising others under the proposed plan.

1.7 Housing
Strongly Agree

1.7.4 Strongly Agree

care needed around speculators buying low market price homes and then on selling quickly to make profit. Consider arrangement conditions saying that homes sold within 5 years , that % of capital gains come back to council. eg 90% year 1, 70% year 2, etc reducing to 0% at end year 5

less "beautification" with little value to ratepayers (e.g. expensive artwork that attracts a couple hundred more people per year to take one photo). Rather continue natural "beautification" of replanting natives to create more corridors for native species and improve overall living quality.

Make shopping space more attractive in town by reducing lease costs, adding more secure parking possibilities for bikes.

I've been encouraging my whanau to recycle and compost everything possible. We're down to about half a 60l bag per week and all foods crops go into our vege garden or the nearby Community Gardens. We're now being asked to pay more for a kaupapa that does not incentivise reduction of waste.

The proposed option is going to cost 4.7 million which could be saved entirely or at least partially passed on to

individual households. Have everyone pay a one-off fee for a small bin (comparable to cost of one rubbish bag per fortnight) and charge extra if they need the bigger one. We have absolutely no need for a big recycling bin for recyclables at all unless soft plastics will be recycled in the near future. In that case, we'd probably be down to one 60l bag per month.

Soft plastic recycling should be a higher priority over big bins for landfill.

1.7 Housing

I live in Omori, our little slice of paradise is a holiday destination. So a lot of the homes are on bookabach or airbnb, short term holiday stays. Other people that own their baches often come for a weekend. If we have wheelie bins, who on earth is going to put them back onto peoples property, we will have bins lining the roads for days and days. People that come for short term rentals really wont care about putting out bins in the right order, eg be it recycling week or rubbish week. They will also probably arrive to full bins and not enough room for their rubbish. When the bags go out they are gone and the streets are tidy. While i realise that wheelie bins might be a good fit for the town centres, they really wont work for our settlement. Please let us keep our rubbish bags.

1.7 Housing

1.8 Development Contributions

No

Is there anything else you would like to tell us about this strategy?

I think there should be set amounts for each thing that is needed in a developement, set out in a table so people understand exactly how much they would be required to pay before they ever start a development. It all seems a bit vague and i think might depend on who was interpriting what was to be paid. It should be straight forward and simple.

we are a holiday homes village and there is already an issue with recycle bins being left on the kerb a sure sign that nobody is at home to welcome break ins. We wouldn't use the green waste bin as we have a Compost. We normally take a Rubbish bag up to the dump instead of leaving it on the kerb as it takes over a month to fill one bag. Then there is the extra cost of over \$400 for bins we wont use, let alone the rates increase will.make it harder during this financial recession!

What do you think we should do more/less of? (be specific)

More zoning for new schools and daycare facilities. More green spaces for recreation near residential areas. More modernization of the town centre. Less intense development with no complimentary services and mixed use spaces.

1.4 Tūrangi Wastewater
Agree

1.5 Taupō North Wastewater
Agree

1.6 Bag it or Bin it
Agree

1.6.4 Agree
There is a third option where you keep the rubbish bags but upgrade recycling crates to recycling bins

1.7 Housing
Agree

1.7.3 Agree
I've witnessed this idea go very wrong, where family and friends of the developer got first dibs on the affordable houses then sold them for significant profit after the time period is up. This scheme works well when it is independently administered and strict timelines for on-selling or renting out the house are applied.

Strongly Agree

Is there anything else you would like to tell us about this issue?

I have lived where there was your proposed option and people ended up with rubbish and recycling around their homes because it wasn't picked up enough and they didn't have room to store it so rubbish ended up everywhere, which leads to a rodent problem. If the option was that we could have or purchase a 2nd bin then maybe that would work. A family of 6 is always going to have more rubbish than a family of 3 and you want them to fit 2 weeks worth into one of those bins, doesn't work. The current rubbish collection is one of the best the country has, why ruin it?

1.7 Housing

1.2 Next 10 Years
Do less
What do you think we should do more/less of? (be specific)

Do less roadworks, who ever keeps reworking the roads that have nothing wrong with them needs to ask the community what is needed. Instead of changing roads where there is nothing wrong with them. As a parent I think pedestrians should be put all around schools and busy areas that is something that is needed to keep our tamariki safe

1.4 Tūrangi Wastewater
Agree

1.5 Taupō North Wastewater

1.6 Bag it or Bin it
Strongly Agree

1.6.3 Strongly Agree
As much as I think the bins would be tidier, I cannot agree with house owners, taking the brunt of the costs again with the way costs of living is at the moment. It simply is unfair, its like saying do the right thing but get punished for it. Even if I did agree I feel it is still unfair that we barely get a say in how it is run. The following for example.

If it did go through, rubbish along with wastefood should be collected weekly not fortnightly for the families with large households. In Māori households there are alot more people living in the home and need weekly rubbish pickup not fortnightly.

Would we still be able to take the red rubbish bin to the dump for free (like we currently swap stickers for bags) if we miss rubbish collection that week or we have more rubbish bags then bin room?

Would we have annual reviews on what is working and what is not.

1.11 Any other feedback?

Since there are 2 schools in the vicinity are we able to get pedestrian stripes on 4 sides of the round about at paetiki? It would make it safer for both schools and give parents like me peace of mind.

Is there anything else you would like to tell us about this issue?

There must be an alternative option and you dont have 1.

1.6 Bag it or Bin it
Strongly Disagree

1.6.2 Strongly Disagree
Strongly Agree

Is there anything else you would like to tell us about this issue?

My mother lives in Napier where they have been using wheelie bins now for some years. The bin is a hazard for her to take down her drive. It can sit for a couple of weeks before it is wheeled down and spend days on the roadside waiting to be brought back. It ends up smelling and she cannot clean it out, again its a health and safety hazard. Also people go round putting their surplus rubbish into other peoples bins.

1.7 Housing

Agree

1.7.3 Agree

Helping people into their 1st home is important.

1.8 Development Contributions

No

Is there anything else you would like to tell us about this strategy?

Considering the huge number of developments happening in the region, the council should have more than enough money from development fees to do a good job in keeping everything upgraded. Those fees are very expensive for anyone paying them.

1.9 Community Funding

No

Please explain why you agree or disagree with these changes. Why change a good thing

1.9.1 Community Q2

Yes

Please explain why you support or do not support the proposed eligibility and assessment framework.

1.10 Waste management and Minimisation Plan

Yes

Is there anything else you would like to tell us about this plan?

People are dumping rubbish on the roadside because going to the dump is so expensive. Yes keep recycling but keep your options real for the everyday person. So many are no longer recycling, too many changes and too many rules.

1.11 Any other feedback?

yes, thank you for the dog park options for walking dogs. Can I please ask for more fully fenced areas where dogs can run free with no joggers, bikes, etc. We have a reactive dog who we rescued, so we are very limited for walking areas. The paddock opposite the dog club is fantastic we don't need much just space to let our dogs be dogs and keep them and people safe. Another area like the paddock would be great. Maybe there is already an area that can be used for this, until it is purposed for something else. But something fully fenced so the dog cannot get out and to make sure humans know it's a dog area.

Forget the wheely bin Idea. Certainly no applicable to holiday home areas, want get used.

Employ an outside consultant to go through the council and its staff to look at reducing costs to the ratepayers. Taupo area should be looking at attracting people to the area, not putting them off with ever increasing rate risers.
