

Taupō District Council
Taupō Ward
Electing 7 Councillors

Duncan CAMPBELL

My principal place of residence is in the Taupō Ward area.

I am a self-employed traffic engineer and married father of four. I moved to Taupo three years ago, and have worked in and out of Councils throughout my working life. I am standing for Councillor because I feel there has been a lack of accountability by Taupo District Council to ratepayers, and they have not been justifying themselves very well. I hope to bring some increased scrutiny toward some of the decision making, in particular transportation which is my field of expertise. I would also like to address the themes of achieving better value for ratepayer money, and providing better opportunities for young people. We are not an affluent district by any means, and I believe Council should be about providing basic infrastructure, with the frills as extra only.
