

## Sketch D - Amphitheatre

An amphitheatre or outdoor stage area for live music and theatre performances would be well suited to the river side scenery of the Riverside Park. Minimum earthworks will be required due to the existing landform. The amphitheatre will have an area of covered seating, for approximately 400 people, and a large terraced lawn area which at full capacity will fit 15,000 people. The amphitheatre's architecture and landscaping should portray New Zealand and Taupo's unique culture, for example panels of local artist landscape paintings and Maori carvings.
