Would you like to present your submission in person at a hearing? *

I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

Feedback

Based on the proposal received from TMGHL, what further development would you like to see on the Hole in One site as outlined in Stage 1 and Stage 2?

NO further development of the site

Do you have feedback on any of the proposed options listed above?

I oppose the complete development. If this was anyone else but an Iwi development company it would be turned town by Iwi.

Iwi oppose I new sewer line going under control gate bridge from the proposed new subdivision off Poihipi Rd but want to build toilets on the lake front.

The lake front should be kept clear and natural for all people to enjoy.

This is a classic case of double standards but the council will approve it.

Feedback

Based on the proposal received from TMGHL, what further development would you like to see on the Hole in One site as outlined in Stage 1 and Stage 2?

Allowance for a food and beverage licence for on-site café

Public toilets

Public viewing deck with light weight roof for shelter (providing an all-weather facility for Hole in One golf)

Access to waterfront

Floating dock and operational hub/storage for on water activities

Include high aesthetic and cultural heritage qualities to become a focal point for the town centre and a project of cultural significance to Tūwharetoa

Do you have feedback on any of the proposed options listed above?

That particular part of the lakefront is not used currently, apart from as a carpark. To add a cafe right on the lake front would be awesome. Better access to the lake and water activities seems like a no-brainer. Will be loved by locals and tourists alike.

Feedback

Based on the proposal received from TMGHL, what further development would you like to see on the Hole in One site as outlined in Stage 1 and Stage 2?

Ticket office

Allowance for a food and beverage licence for on-site café

Public viewing deck with light weight roof for shelter (providing an all-weather facility for Hole in One golf)

Significant retaining of the bank that drops from the tee area to the foreshore

Access to waterfront

Potential reconfiguration of footpaths and public parking areas

Include high aesthetic and cultural heritage qualities to become a focal point for the town centre and a project of cultural significance to Tūwharetoa

Do you have feedback on any of the proposed options listed above?

it may not come to fruition but would be an asset and look better than the car park that has been constructed on the " main street " this would actually connect us to the lake . It would become a destination . Dont need toilets so close to lake they are over in the reserve .

Do you have feedback on any of the proposed options listed above?

Don't think a visitor centre would be suitable at this location due to limited parking and different motivation for people visiting this site. Visitor centre with much more parking is already located around the corner and other booking offices (Experience Taupo, Peter Pan) have not lasted long in the past.

Events space not suitable here due to limited parking. Plenty of event spaces available in Taupo already.

Would there be a separate lease for on-water activities for external businesses? There are plenty dotted along the lake front whose customer numbers would drop if there was a new business venture to open here.

Sounds like an amazing opportunity to allow better connection to the lake closer to town. The current scrub covered cliffs keep you isolated from the lake. A development by Tuwharetoa makes sense as well. It will allow a culturally and environmentally significant development. The proposed designs and plans sound like they will still allow public access and use of the front. I think this is crucial to maintain. Over all it looks like an exciting proposal.

Taupo's waste water can not uphold our summer influx of visitors without issues. Having this on the lake front will cause pollution of our lake once again when your system fails. The hole in one is a thriving business and does not need to expand at the expense of our beautiful clean lake. The lake and the views are for everyone to enjoy don't destroy that with an unsightly building.

I believe that Taupo has a natural beauty. It is special to live in a town that sits on the shore of a natural wonder such as our mighty lake. I have seen developments such as the proposed outlined in the submission in many places around the world. These developments do nothing to enhance the natural beauty of the area. What they do is clutter the view and take away the very essence of what people come here to see. I believe we should be preserving what we have for all to enjoy rather than changing it and having buildings and structures being our focus. Currently there is a lot of development happening in our town but it is not on the lake front. Please consider keeping the integrity of our lake front as it is and keep the development away from the waters edge.

Access to waterfront
Floating dock and operational hub/storage for on water activities

Do you have feedback on any of the proposed options listed above?

no building Of any nature or culturally inspired installetion should be allowed to be constructed on the lake side of the road above the current level. If it were to be done like the water treatment plant and was below ground level leading to the lake then i would not object. It will be An obstruction to the lake view. Once you allow this then there will be open slather along the lake front and you will destroy the whole ambience of the lake front . do not go down this track just because of who owns the lease an any fear of offending or being called racist. ! Protect the asset that the region has.

No way should there be any major development on the lakefront! The natural beauty would be greatly impeded by any development of this kind and I am adamantly opposed to this, like many other locals I have spoken to about it. I imagine most people here will not support this and I hope council does listen to local concerns rather than their own views on this matter.

There is no lack of food outlets in the area.

A floating dock for other water based activities seems foolish in a zone where inexperienced golfers can hit balls in any direction without warning.

I find it difficult to believe that a new project of cultural significance can be created on a purely for profit operation that has been running for a considerable length of time.

Finally, an events/function centre sounds a lot more of a project than just improving the operation. This seems like a back door route to changing planning restrictions on the lake front.

Based on the proposal received from TMGHL, what further development would you like to see on the Hole in One site as outlined in Stage 1 and Stage 2?

NO further development of the site

Do you have feedback on any of the proposed options listed above?

I believe that alot of the allure of Taupo is its untouched beauty. A development this significant is over the top and would inevitably take this feeling away.

To have one businesses be able to change the entire look of the lakefront is also not a president that I want to see started. From a commercial stand point this could be a can of worms.

I would also ask why have there never been submissions for previous developments before? There have been many pioneers want to do this over the years but getting approval from TWMTB has been impossible. Reasons for this were always because the development would disrupt the land and destroy its nature and beauty. Now they own the business this all of a sudden doesn't matter, as I said above this project would be a can of worms and show some real inequity if it was ever approved.

Regards

Mike South

Would you like to present your submission in person at a hearing? *

I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

Feedback

Based on the proposal received from TMGHL, what further development would you like to see on the Hole in One site as outlined in Stage 1 and Stage 2?

Allowance for a food and beverage licence for on-site café

Public viewing deck with light weight roof for shelter (providing an all-weather facility for Hole in One golf)

Significant retaining of the bank that drops from the tee area to the foreshore

Access to waterfront

Function/events space and educational centre that could be used by the wider community

Visitor centre for information about other attractions

Floating dock and operational hub/storage for on water activities

Include high aesthetic and cultural heritage qualities to become a focal point for the town centre and a project of cultural significance to Tūwharetoa

Do you have feedback on any of the proposed options listed above?

i love this idea! Taupō is a beautiful place but doesnt have many kid friendly activities other than nature walks and exploring the lake. Creating more attractions and upgrading the ones we have to cater to all weathers is a great idea in my opinion

Is there anything else about the draft Reserve Management Plan you would like to comment on?

(You can view the strike through/underline version [HERE](#))

i love the look of the plans and would love to see Towharetoa history within it

Public Bodies Leases Act 1969

The TDC cannot consent to the 33 year Lease requirement within the TGMHL proposal without following the requirement of Sect 8 Public Bodies Leases Act 1969 which requires every lease granted to be sold by way of Public Auction or Tender.

How did the TGMHL proposal get Council Approval in Principle without flagging the Public Bodies Leases Act 1969 requirement?

How can the TGMHL proposal be properly evaluated without the detail of the proposed Lease provisions being available? TDC - Please publish Draft Lease Agreement that will be offered under Sect 8 Public Bodies Leases Act 1969 and timeline for Public Auction or Tender.

Solution for TGMHL

There is of course waterfront land which is not public reserve which the TGMHL applicants could consider between Wharewaka Reserve and Five Mile Bay Reserve that would benefit from the type of development that TGMHL are proposing with desperate need for improvement and much

more area for parking than Taupo CBD. Also could be a great area for a camping ground that would benefit from public toilets/ food outlet/ hole in one and other recreational activities.

TDC - Attend to the worst areas first.

Based on the proposal received from TMGHL, what further development would you like to see on the Hole in One site as outlined in Stage 1 and Stage 2?

Ticket office

Allowance for a food and beverage licence for on-site café

Public toilets

Public viewing deck with light weight roof for shelter (providing an all-weather facility for Hole in One golf)

Significant retaining of the bank that drops from the tee area to the foreshore

Access to waterfront

Potential reconfiguration of footpaths and public parking areas

Floating dock and operational hub/storage for on water activities

Include high aesthetic and cultural heritage qualities to become a focal point for the town centre and a project of cultural significance to Tūwharetoa

Do you have feedback on any of the proposed options listed above?

I fully support the development of the greater lakefront area, think how awesome Queenstown, Wellington, and Auckland waterfronts are.

However, I think it should be a condition that Tūwharetoa Māori Trust Board will support other commercial developments and projects on lake edge so that they don't get to monopolise it.

The area is an area that should be respected and protected. It is somewhere of outstanding views of the lake and mountains. This would forever be lost for monetary gain.

There is no need for more food outlets and with the redevelopment already taking place Taupo is able to provide pedestrians safe access to cafe and eateries.

The proposed need for increased space is not supported by the numerous times there is no-one there using the current hole in one.

The provision of toilets are not necessary. The current waste infrastructure already struggles, by adding public toilets the risk of further waste spillage is increased.

There is no need for any business to be deemed 'the entrance to Taupo, the lake and mountains do that in a far more majestic manner than a building that is reminiscent of a 70s Swedish bus stop. Hardly visually beguiling.

I would ask the council listen to the people of the town who want the lake front protected from further unnecessary development.

Is there anything else about the draft Reserve Management Plan you would like to comment on?

I do not agree that developing this further outside the boundary of their current conditions is necessary or progressive. Lake Taupo township is known for the incredible views and access to the water, we do not need to be known for slowly chipping away at it for the sake of money that benefits only a few.

a big NO to anything that blocks the view across lake to mountains. All the road changes were to enable people to more easily enjoy this view and access to the lake front so why clutter it up with a cafe (when there are many across on End of Robert's street) a public toilet (when the Super Loo is just around corner) and an ugly structure holding up a roof shelter.??

As a NZ citizen who grew up in Taupo I wish to express my utter dismay at the Hole in One proposal. I believe this proposal is not for the greater good. The greed of a few should not be given priority over the local and broader communities.

Lake Taupo is a world renowned tourist destination. It is the undisturbed view of the lake and mountains that primarily draws people to this wonderful place.

As a person who frequently visits the foreshore, I have noticed the volume of tourists in this area, the young families and elderly people who also capitalise on enjoying this place.

Already in existence are good walkways which are very well utilised and appreciated by the Public. The Hole in One proposal will needlessly disturb this and negate the government money already spent.

If this proposal were to proceed then the floodgate would surely open for other future development proposals. You cannot shut the gate after the horse has bolted!!! I despair that the famous view of Lake Taupo and the mountains would slowly disappear for the majority of people living and visiting Taupo.

A genuine and thoughtful long term plan must be developed by the government for this area. It should not always be about money. Please consider our needs and wants, not just those of any profit making developer.

This development is overdue. There is currently a bottleneck when walking around the current bus, and the spectators often block the shared path. This is not overcome by the straight ahead, where there is no painted priority for pedestrians or cycles going straight ahead over cars turning across the path.

The site is exposed and doesn't offer sun shelter, wind or rain cover. The tasteful modern design offers sun and rain, the open sides a relatively unimpeded view for those walking, riding or driving past, bar the buildings, which are a relatively small proportion of the overall length. The combined effect is less than one truck or camper van parked.

I think this enhances the vision for more connectivity between the town and the lake, expanding the availability of toilets, something overdue in the area and at no/less cost to ratepayers. My observation is that this area of the lakefront is not used a large amount at the moment. Increasing access and the natural migration of some people to recreate here will reduce pressure in other areas, benefitting both residents and visitors.

TMTB have done a good job as kaitiaki of Taupo Moana and this proposal continues that

tradition.

Please do not spoil the natural beauty/stunning scenery along the lakefront by allowing any type of building or development to go ahead. The (mostly) untouched beauty of the lakefront is what makes it so spectacular. PLEASE PLEASE PLEASE just leave it alone. Not everything has to be about making money or progress/moving forward. In this busy, crazy world we live in, some things are better left untouched.

I believe that the buildings should not go ahead, if you must, just make it small so the beauty of the lake and mountains are not blocked off, as this is our main tourist attraction for Taupo. It would be a huge shame to lose the beauty of the views! Swimming access could be cool as long as it is not blocking off the hole in one l.

Is there anything else about the draft Reserve Management Plan you would like to comment on?

(You can view the strike through/underline version [HERE](#))

It will look too industrialised, this is not Taupo.

Based on the proposal received from TMGHL, what further development would you like to see on the Hole in One site as outlined in Stage 1 and Stage 2?

NO further development of the site

Do you have feedback on any of the proposed options listed above?

The best part of the Lake Taupo waterfront is the lack of any structures impeding views across the lake. This will be an eyesore on a currently beautiful part of the country.

One of the neat things about the current hole-in-one operation is how basic it is. It has a very New Zealand feel to it. Not overly commercialised, and not contained in a over-sized structure impeding views for all.

It would be a real shame to lose the feel that the current Taupo lake-front has, all for a commercial, money-making venture.

NO further development of the site

Do you have feedback on any of the proposed options listed above?

I do not support any alteration of the lake front.

This is a unique & special area of our district & should not be further developed in any way. We have a uniqueness here in that the lake front is unimpeded by buildings & this should not change.

We already have an I site available, There are Plenty of Places providing Alcohol, coffee etc. Toilets are at the Boat Harbour and behind the Firestation. I see no need for such a Extension to go ahead and ruin the Lake Views. And only a license to occupy.

Many Thanks Jan Smith.

Feedback

Based on the proposal received from TMGHL, what further development would you like to see on the Hole in One site as outlined in Stage 1 and Stage 2?

Ticket office

Public toilets

Significant retaining of the bank that drops from the tee area to the foreshore

Access to waterfront

Do you have feedback on any of the proposed options listed above?

the addition of a food & beverage outlet will not be advantageous to the town and is quite a far stretch from the current scope of operation.

Conference facilities are large creating an eyesore on our foreshore, something that can be created elsewhere.

floating dock - not needed and an environmental impact.

the rest, not the place for it, all the outcomes can be achieved elsewhere

by allowing bevelopment on this site the council is setting a precedent for other developments along the reserve. The charm of the lake front is that there is no development along the foreshore. This is a public reseve and should remain so. No one partty should be allowed to use it for financial gain. If a private individual tried to develop this site the would not be granted permission by the various boards or council.

A big NO from me and i hope the council listens to the rate payers this time and not do what thay want to and ignore the negative feedback and do what they want.

I feel that once we start allowing more "permanent" commercial infrastructure to be implemented along the lakes shoreline . It will cause an irreversible shift in the current acceptance of what is allowed on the lake foreshore . We will see more and more applications and approvals over time . I would hate to lose the great views and free access to the lake that we have now . I was disappointed when the two mile bay sailing Club was given permission to set up a restaurant and bar on the lake . I have no issues with temporary or portable seasonal venues as we have currently. To put a large permanent commercial structure along the lakes foreshore is not in keeping to what Taupo has always been a beautiful lake destination where all can enjoy beautiful lake views with ease of access.

Taupo is already being ruined with the constant quest for "money making" projects.

I have been coming here all my life and finally chose Taupo to retire to mainly because it has over the years giving me so much joy and pleasure and relaxation.

In the 6 years I have lived here it has been turned in to a nightmare of overcrowding with buildings being erected in places which were once considered havens.

The thought of the Lake front being contaminated with any form of more buildings I find revolting and am amazed that our local Council is even considering such a venture. But as they have proven in the last few years, they do not listen to anything that the RATE PAYERS say about our town and seem to be hell bent on destroying what was once a beautiful and natural New Zealand small town.

Beware of the long term consequences of putting money and tourists ahead of the wishes of local inhabitants.

It is a good proposal but should also consider pedestrian access over Lake Terrace as a larger increase in visitors means the current road is too busy to cross safely. This would also align with the climate change initiatives and focus on health and wellbeing, rather than priority given to vehicles.

The proposal will significantly change the feel / ambiance of a relaxed town and water front into a commercial area like 2 mile bay.

People like to take photos of the lake and mountain. The area has a very NZ and green feel. This green feel is what will set Taupo apart from other tourist towns, which is a very marketable trait to visitors..

I am opposed to them getting a lease

Do we really need a function/events center and educational center on this prime Taupo site. If there is a need for an function/events center create a joint partnership and develop the Taupo Yacht / boat club, as this facility could do with a spruce up.

Is there anything else about the draft Reserve Management Plan you would like to comment on?

(You can view the strike through/underline version [HERE](#))

I am opposed to them getting a lease. They should be happy they have a license.

Do we really need a function/events center and educational center on this prime Taupo site. If there is a need for an function/events center create a joint partnership and develop the Taupo Yacht / boat club, as this facility could do with a spruce up.

Why do they need access to the water front. I suggest they have other developments planned that they are not letting on about. (Float plane docking!!!) Like 2 mile bay again.

There are plenty of cafe within 300-400 meters.

Nothing wrong with the visitors center where it is, which is central to the town ship. Why do we need another one

I fully support the proposed plan. The designs look fantastic and it would be really great to have this development so we can make the most of the waterfront. I've always thought the waterfront is significantly under utilised and that it would be great to have more cafes and interactive public spaces there.

I really love the idea of a floating dock, access to the water, cultural aesthetic and having a cafe.

Is there anything else about the draft Reserve Management Plan you would like to comment on?

(You can view the strike through/underline version [HERE](#))

It would be nice to see some planting more native trees around the development and to create more shade (in the future) and a natural feel.

I think that lake front should not be developed any more than it is.

Taupo has an open water front and that is one of the attractions, it is special and should stay that way.

If you start making exceptions for whatever reason, you will end up with no open lakeside.

I do not feel that building this void of any uniqueness or design aesthetic that will obscure so much waterfront view should be approved, it is not necessary and it is not vital. The hole in 1 operates perfectly fine now and makes Morrrre than enough profit from their already exceptionally high rates for what the service actually is, their business profit margins will be ridiculous, and then the measly fractional rates they insultingly offer to divers to retrieve the balls again, well let's not mention that.

They do not need to take up any more lakefront views than they already do. It would not be fair and would be detrimental on all the businesses and houses situated behind it it that then have their longstanding views of the beautiful lake and scenery blocked.

of all the attractions in taupo, this is one that DOES NOT need this kind of development or extra focus. This money could be very well spent on many other aspects of taupo that need it alot more than an already successful and profitable business that is managing to stay busy on any day of the week.

Why would the town want or need another visitor activity booking office there, this will only detract from the businesses in town that ate already struggling to sell tickets for local things. Has anybody consulted the isite on how they feel about a booking and info office being opened??

facepalms at taupo councils logic sometimes

So, yeah, in summary...I vehemently DISAGREE with this planning motion and DO NOT think it should be allowed to go ahead as it definitely not an essential need for the town.

Further commercialization of this precious area of our lake is in money-making interests only. Keep the commercial outlets up on Roberts St (after all, that's why we're changing the whole town layout at the moment, right), where they don't impact the lake. Development on the lake edge will detract from the natural beauty of the area; further degrade an already fragile cliff face; increase rubbish in our lake; commercialize an asset that is for everyone; and make traffic along Lake Terrace even more congested. Please leave our lakefront alone - build recreational and hospitality outlets elsewhere.

I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

Feedback

Based on the proposal received from TMGHL, what further development would you like to see on the Hole in One site as outlined in Stage 1 and Stage 2?

Ticket office

Allowance for a food and beverage licence for on-site café

Public toilets

Public viewing deck with light weight roof for shelter (providing an all-weather facility for Hole in One golf)

Significant retaining of the bank that drops from the tee area to the foreshore

Access to waterfront

Potential reconfiguration of footpaths and public parking areas

Function/events space and educational centre that could be used by the wider community

Visitor centre for information about other attractions

Floating dock and operational hub/storage for on water activities

Include high aesthetic and cultural heritage qualities to become a focal point for the town centre and a project of cultural significance to Tūwharetoa

Do you have feedback on any of the proposed options listed above?

What a super idea! Just look at how the 2 mile bay sailing club has developed over the last 10 years from a simple single purpose attraction to a multi-purpose community used & visitor used asset. Do the same with the hole in one and any other lakefront attractions & areas as long as the public still has free access to enjoy all the area.

Is there anything else about the draft Reserve Management Plan you would like to comment on?

(You can view the strike through/underline version [HERE](#))

It all looks pretty good to me!

I have previously applied a couple of times to be able to put a food truck on the lake front (totally self contained) but have been told NO further licenses are available. How is it this license is available to some and not others?. We do not need more public toilets and who is going to pay for keeping them clean?. The lakefront is best left unspoiled and accessible to all. Who is going to be expected to pay for the upkeep of the carparks empty the rubbish bins etc, who is going to pay for all the upgrades to the carpark, building of toilets, road works, retaining the bank at the lakefront?. If TWH are going to pay for ALL of this including future rates and other taxes ok but if the rate payers are expected to pick up the bill so TWH can take all the money and not pay for this then that is unacceptable as it is exploiting the rate payer for personal gain.

Is there anything else about the draft Reserve Management Plan you would like to comment on?

(You can view the strike through/underline version [HERE](#))

Yes. Who is it that decided to put the traffic lights in Titiraupenga streets and on Spa road?. This has and is going to cause major traffic congestion going forward. Why were roundabouts not used? as they would have kept the traffic flowing. The people in charge of this should be removed from their positions as they have wasted hundreds of thousands (if not millions) of tax payer money on a totally flawed traffic system. It is quicker and will always be quicker to use Tongariro street at 30Kmh than the new route up Titiraupenga st. I along with others have timed the 2 different routes and it works out quicker every time which shows the major failings of the new system put in place. Total incompetence on behalf of the Taupo Council to have approved and allowed this to happen.

I object to the proposal to erect any structure for the Hole in One sited on Lake Terrace for the following reasons

1. It will be an eyesore as there are no buildings of this type anywhere around the lake edge. The only exception might be the Sailing Club at 2 Mile Bay although this blends and has little effect on the lake vista from the Lake Terrace area
2. It will inhibit the current view of the lake as seen from a number of points around the southern CBD area and Lake Terrace
3. It will allow the approval of other structures of this nature as the hole in one approval will have set a precedent
4. The proposed construction is ugly and and the materials have no relevance to the area

I can support stage 1 but if supporting stage 1 is considered automatic support for stage 2 then I withdraw my support for stage 1.

There is insufficient information on stage 2 as to the extent and location. There should not be any major developments in the current hole in 1 location along the waterfront. This is completely the wrong location.

Public viewing deck with light weight roof for shelter (providing an all-weather facility for Hole in One golf)
NO further development of the site

Do you have feedback on any of the proposed options listed above?

There should be NO development anywhere on the lakeshore of Lake Taupo, other than existing (they're lucky!)

Council and Tuwharetoa will have seen how hugely successful the Two Mile Bay Sailing Club has become and I assume you'd like to cash in on it. But not from this site!

Cafe/food and beverage might sound like a nice idea but we already have lots of fabulous cafes in town. It will add to the rubbish already collecting in the area.

Definitely no toilets should be allowed beside the lake.

what are you thinking allowing beach access and a floating dock with an operational hub and storage for water activities at a site where golf balls will be flying above your head?? this type of activity is more suited to be developed and located down by the Yacht Club near the river mouth. A function/events and education centre could also be located near the Yacht Club - not below the Hole in One.

NO NO to a Visitor Centre being located here - it is not the centre of town and we already have a good one in town.

The Lakefront Reserves Management Plan should NOT be amended in any way.

i do not agree with further development of this special site. Being right on the lake edge means this area must be left free of commercial and indeed any other development. If this is allowed then a precedent for further development would be set. This is very undesirable from an environmental and cultural point of view.

We are submitting to Taupo District Council's 'Tapuaeharuru Bay Lakeshore Reserves Management Plan - Hole in One site'

Enterprise Great Lake Taupō Trust Trading as Amplify is the economic development agency for the Taupō district, and we are charged with growing the local economy. Our strategic objectives are closely aligned to those of Taupō District Council (TDC), in that we wish Taupō district to be the home of competitive, innovative and sustainable business.

The Board & CEO of Amplify have received the consultation document and presentation proposal and have reviewed the documents in full to consider and prepare this submission.

We believe there are significant areas of positive economic impact that will be realised if this development proceeds. We **support** the development as we believe this opportunity will deliver sustainable, significant and positive economic benefits for the Taupō District.

Tapuaeharuru Bay Lakeshore Reserves Management Plan - Hole In One Site:

Taupo District Tourism Asset Enhancement

- We believe this proposed development will have positive aesthetic and economic outcomes by refreshing and redeveloping an iconic Taupo tourism attraction.
- The proposed development looks to enhance and extend the tourism offering within the Taupo district, helping to attract and draw additional visitors to the region.

- This opportunity provides the region with additional public toilets, food & beverage and hospitality offerings and proposed community spaces for education and events.
- The proposed development looks to be aesthetically pleasing and will be an additional attraction for the region. It provides additional access to the lakefront for tourists and locals and looks to amplify the standard of the lakefront.

Tūwharetoa Māori Trust Board (TMTB) are Kaitiaki of Taupo Moana and Awa.

- TMTB and it's subsidiary Taupō Moana Group Holding Limited (TMGHL) are focused on growing the commercial and long term wealth of the Trust Board for the benefit of Ngati Tuwharetoa, through their work they are committed to maintaining and enhancing the health and wellbeing of Taupo waters.
- TMGHL is invested in key tourism ventures in the Taupo district including, Ruapehu Alpine Lifts Gondola Investments, Chris Jolly Boats and Lake Taupo Hole in One. Their private investment and willingness to develop and drive much needed new tourism activities and experiences help create more productive economic outcomes for the region.
- The development has the potential to create new jobs and generate additional GDP for the local economy.
- TMGHL are involved in a cadet program supporting youth into work within the Taupo district to bring economic and social prosperity to the region.

Taupo Town Center Transformation

- The proposed development aligns with the Taupo Town Center Transformation (TTCT) project to attract people to Taupo's world-class waterfront and strengthen the connection of the Taupo waterfront and town centre. The development's proposed additional public amenities will extend facilities and enhance visitor activations at the western entry of the town centre.
- The proposed potential reconfiguration of parking and footpaths will need to be considered carefully to ensure the health and safety of pedestrians and vehicles and the appropriate integration with the TTCT project.

On this basis, we wholly support the application.

Amplify Strategic Plan Summary 2021-2024

Vision: Taupō is a vibrant and prosperous district, where both talent and business thrive.

Mission: We leverage Taupō's natural advantages and work with business & stakeholders to champion sustainable growth throughout the district.

Purpose: We exist to grow the economy of the Taupō district.

We do this by being the champion for development and sustainable growth; collaborating with others to accelerate outcomes; facilitating and enabling programmes and services that support local business & industry; focusing our energy and resources on projects that have demonstrable impact; supporting & connecting across the private & public sectors; and delivering high value outcomes in all that we do.

	SHORT TERM HORIZON		MEDIUM TERM HORIZON		LONGER TERM HORIZON	
	Home of competitive, innovative and sustainable business	Smart, nimble and connected	A place where talent thrives	Great ideas grow from shed to stock exchange	Leverage our natural advantage	Investment ready environment to accelerate growth
Outcomes	Taupō District's economy is underpinned by a diverse mix of business from a wide range of sectors. From sole traders to large industry, our businesses are robust, dynamic and competitive. Our labour market needs are fulfilled to ensure industry productivity is sustained, and a variety of education providers and options are offered. Our tourism offerings are the best in NZ and authentically reaffirm the Great Lake Taupō point of difference.	As an organisation, we are focused on creating high value outcomes for our stakeholders and with our partners. We operate with an ethos of fiscal prudence, and leverage the skills and connections of our Board and team to fulfil our duties. Our strong governance and dynamic operating model ensure we are agile in thinking and action. Our business community benefits from being informed, connected and inspired. We are connected to the right influencers and advocate to achieve our mission.	With World-class education and training opportunities on offer, Taupō District is a place where career pathways are both defined and enabled. Our recognised position as New Zealand's Centre for Geothermal Excellence ensures we are at the leading edge of innovation. We celebrate and showcase our local talent, and attract high-achievers to our district.	Taupō District is a fertile and supportive innovation environment where entrepreneurs can take an idea and successfully turn it into a business reality. Start-ups are attracted to the region by our low-cost / high-support model. Our innovation culture and access to incubation and rapid-growth resources result in widespread start-up success.	Taupō District is recognised as New Zealand's Centre for Geothermal Excellence, with academia & industry maximising our abundant natural resource. We are prominent in the national mix of international film-worthy locations with pathways for production and a robust facilitation package on offer. The District has a strong Health & Wellbeing sector that fully leverages our spa destination potential. Our central location and commitment to carbon-free NZ targets attracts synergistic commercial and educational opportunities.	New business and industry is attracted to the Taupō district by our natural and competitive advantages. Our physical environment is ready for large scale investment with essential infrastructure in place. We roll out the red carpet for investors, not the red tape, and have a proactive approach to seeking new opportunities for the district.
Interventions	<ol style="list-style-type: none"> 1. Diversify & enhance tourism infrastructure & experience offerings 2. Increase business support service 3. Increase training and education opportunities for businesses and individuals 4. Participate in Regional Skills Leadership Group workstream 	<ol style="list-style-type: none"> 5. Provide opportunities for businesses to learn, engage and connect 6. Increase business community understanding of our services 7. Strengthen connections within key central govt agencies 	<ol style="list-style-type: none"> 8. Establish and further develop Centre for Geothermal Excellence cluster 9. Increase scope, scale, quality and type of education offerings 10. Increase profile of high-achievers 11. Attract skilled talent to the district 	<ol style="list-style-type: none"> 12. Provide access to incubation programmes 13. Actively foster and promote innovation culture 14. Provide opportunities for start-up validation 15. Provide pathways for investment and capital raising 	<ol style="list-style-type: none"> 16. Improve our understanding of Health & Wellbeing and Carbon-Reduction opportunities 17. Would you like to present your submission in person at a hearing? *

I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

Feedback

Based on the proposal received from TMGHL, what further development would you like to see on the Hole in One site as outlined in Stage 1 and Stage 2?

Ticket office

Allowance for a food and beverage licence for on-site café

Public toilets

Public viewing deck with light weight roof for shelter (providing an all-weather facility for Hole in One golf)

Significant retaining of the bank that drops from the tee area to the foreshore

Access to waterfront

Potential reconfiguration of footpaths and public parking areas

Function/events space and educational centre that could be used by the wider community

Floating dock and operational hub/storage for on water activities

Include high aesthetic and cultural heritage qualities to become a focal point for the town centre and a project of cultural significance to Tūwharetoa

Do you have feedback on any of the proposed options listed above?

As this section of the lake front already has the existing hole-in-one challenge, this is an ideal location to re-develop (rather than develop an entirely new location). There are large areas of un-developed lake front, and one area of development will not create un-due impact on the views and character of the lake-front.

The 2 mile bay sailing centre is extremely popular, and has been allowed further development in recent years. It would be nice to have a similar venue closer to the town centre. I personally would welcome another location that capitalises on the lake-front location, and creates some competition with 2 mile bay. A public toilet in this location would help protect water quality. Allowing the development that has occurred at 2 mile bay, and not at the Tapuaeharuru Bay hole-and-one challenge site would be inconsistent.

Is there anything else about the draft Reserve Management Plan you would like to comment on?

(You can view the strike through/underline version [HERE](#))

Two mile bay sailing centre has been removed from the draft Reserve management plan, as their lease is of the Lake Bed. However I do not agree with this removal. There was recently a large amount of development at the site, within the lake shore reserve, and there is a licensed seating area etc. within the lake shore reserve, therefore this part of the the Sailing Centre is still well within the scope of the TAPUAEHARURU BAY LAKESHORE RESERVES MANAGEMENT PLAN.

Ticket office

Allowance for a food and beverage licence for on-site café

Significant retaining of the bank that drops from the tee area to the foreshore

Access to waterfront

Function/events space and educational centre that could be used by the wider community

Visitor centre for information about other attractions

Floating dock and operational hub/storage for on water activities

Do you have feedback on any of the proposed options listed above?

I think above ground structures should be kept to a minimum; providing a roof/structure to allow all year round golf driving should not be the focus of the site. I see value in an attraction that includes the potential ticket office, function space, education centre as well as creating better access to the waterfront but hope that this could be incorporated in to the existing landscape and the majority of the building be at or below road level. In general I don't believe we should move to allowing structures that obstruct the lake aesthetic, e.g.: a public viewing deck with a lightweight roof.

Is there anything else about the draft Reserve Management Plan you would like to comment on?

(You can view the strike through/underline version [HERE](#))

No

I fully tautoko TMGHL with their plans. These plans will enhance a growing Taupō whilst keeping the unique culture of Ngāti Tūwharetoa, our Moana and ngā Maunga front and centre. Quite frankly we couldn't even pay for this kind of quality and here we have TMGHL offering their plans which will benefit our entire community as well as Manuhiri.

I urge TDC to do their utmost to support TMGHL in bringing their plans to fruition. My hope is that the open, transparent and flexible communication from TMGHL will put the minds of the Ratepayers association etc at rest.

Do not spoil our lovely natural lake front. It is a feature as it is unspoilt and reasonably free from commercialisation.

We fight to keep our lake clean and litter free. I would be concerned that a development would add to the pollution in our lake.

Once 1 venture is approved it opens the door for others.

The view from existing properties on the other side of the road would be compromised.

A commercial development along the waterfront would take up even more parking for visitors.

We are trying to encourage walking running and cycling along the Lions walkway. This proposal would interrupt people along the path.

Do NOT Touch the waterfront other than maintain what is there. Keep it simple, safe, natural, building free. Do not allow more businesses to trade along there.

Would you like to present your submission in person at a hearing? *

I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

Feedback

Based on the proposal received from TMGHL, what further development would you like to see on the Hole in One site as outlined in Stage 1 and Stage 2?

NO further development of the site

Do you have feedback on any of the proposed options listed above?

Leave it as is. Part of Taupos natural beauty is its minimal commercialisation. If this was a Pakeha company the Trust would likely be up in arms about changing or profiting from nature.

Feedback

Based on the proposal received from TMGHL, what further development would you like to see on the Hole in One site as outlined in Stage 1 and Stage 2?

NO further development of the site

Do you have feedback on any of the proposed options listed above?

Dear Sirs

This building application to develop the Hole in One Golf site should be refused, and though it is understandable that the Hole in One Golf business owned by the Taupo Moana Group Holdings would like to weatherproof their venue, it should possibly be build it into the bank, below road level. The plans outlined, which propose a cafe, cultural centre, information centre and toilets is NOT required or necessary, as apart from obstructing the view of the lake for the already existing hospitality providers, most of the facilities outlined are already provided for within walking distance of the Hole in One Golf site.

Why change the council's present bylaws? The bylaws protect the lake front and restrict the building of anything which would compromise the scenic beauty of the lake front, enjoyment of the locals and visitors or block views from hospitality providers, already on site or take revenue away from existing tourist providers such as food outlets, the museum, information centre and the Great Lake Centre, as well as the Superloo, all within walking distance of the proposed site and who all bring necessary revenue to the town.

The concern of most ratepayers is that if consent is given to this proposal it will set a president

which will clutter the lake front with more buildings of a similar nature.

The repercussions of the wrong decision by council on this issue, will have a detrimental effect on the future of the lake front, which is the major asset of the Taupo District.

We feel strongly that this issue should be put to the vote by ratepayers and that the wishes of the majority should be heeded.

Feedback

Based on the proposal received from TMGHL, what further development would you like to see on the Hole in One site as outlined in Stage 1 and Stage 2?

NO further development of the site

Is there anything else about the draft Reserve Management Plan you would like to comment on?

(You can view the strike through/underline version [HERE](#))

I would not be in favour of a lease being granted as this allows for legal interest in this piece of land. The water front is a community asset and should be accessible and owned by all in the local community.

Any development particularly under a lease agreement could lead to further developments on the Lakeshore.

Could the Hole in One development not move to above the water filtration plant at 36 Lake Terrace (near the junction of Rifle Range and Lake Terrace) where a platform is currently available and a car park alongside. Any development of cafes, food and beverage kiosks etc, here would have less of an impact on town centre businesses than development of the current Hole in one site.

With the change to through traffic in Taupo using Titraupenga street, development of the Hole in one site could create traffic congestion because southbound through traffic would need to turn right onto Lake Terrace across the flow of northbound traffic.

NO further development of the site

Do you have feedback on any of the proposed options listed above?

No development such as permanent buildings and structures are allowed by any temporary licence holder and this Reserve.

This rule must continue to apply until the Management Plan has been totally reviewed.

Is there anything else about the draft Reserve Management Plan you would like to comment on?

(You can view the strike through/underline version [HERE](#))

The two page strike through/underlined draft amendment only addresses part of the 79 page Plan.

Council needs to review the whole Plan, for the benefit of all ratepayers and the community.

Refer also the supporting document.

Taupo Marina Ltd

Richard Hoadley

Attached Documents

File
TDC - Hole in One 2022 - Hoadley

Submission to Taupo District Council

Tapuaeharuru Bay Lakeshore Reserves Management Plan (Hole in One site)

From Taupo Marina Ltd., 36 Stanley St, Taupo 3330. Phone 07 3768939

TDC has requested "we want to hear your thoughts on their proposal".

1. TDC should first be concentrating on what changes need to be made to the Tapuaeharuru Bay Lakeshore Reserves Management Plan. If any?

Until that has been done, how can any proposal be considered compliant with the intent of Management Plan and the future of the lake front Reserve?

2. TDC has noted on their web site that the consultation relates to Step 2, being the consultation of the draft amendments to the Tapuaeharuru Bay Lakeshore Reserves Management Plan (Plan).
3. TDC has also explained that "a licence is a short term right to occupy a property for a particular use and it does not give any right to exclusive occupation or allow for buildings to be erected."

Clearly then this site is not appropriate for a licence holder who has alternative requirements for any use beyond a short term, and certainly not after 2031.

4. TDC is proposing a major change to the Tapuaeharuru Bay Lakeshore Reserves Management Plan and the manner this change is being portrayed is both wrong and not appropriate for the intended use.
This site is not an appropriate site for the development that has been proposed by the current Licence holder.
5. The strike through/underlined version of the Tapuaeharuru Bay Lakeshore Reserves Management Plan provided as a consultation document is specific for the current licence holder. It only provides suggestions for part of the Plan, so that leaves many clauses not considered and therefore the whole Plan is not adequately as wholly considered as part of the submission process.

If this draft amendment is specific for one licence holder and a few others, how will that effect future applications for temporary licences?

It begs the question that the whole Plan is not suitable and needs to be reviewed before a specific new application is considered.

The Plan needs to be readvertised for public consultation, without reference to specific situations of use.

6. The strike through/underlined changes proposed are not appropriate.
7. It has been noted that TMGHL is the commercial subsidiary of the Tūwharetoa Māori Trust Board. They currently hold a **licence** over part of the Taupō Lakefront Reserve that lets them operate the Hole in One Golf activity.

The proposed new development can not be allowed under the current operating licence conditions.

8. Why include a provision for a Lease in the Plan?

This creates many commercial questions that need to be addressed. Site land values, establishment of commercial rents and allowance for services required, such as sewerage, water and power.

Rubbish collection, access, parking and many other rules and conditions need to be considered. All as appropriate on a public Reserve?

Keep it simple and maintain the status quo please.

9. The Lakeshore Management Plan Adopted 2008 provided as a supporting document includes the following criteria in Part 6 Implementation;

- Within 1-3 years (ie by 2011) for the Lakefront Reserve, 'negotiate lease agreements with three entities. But not the Hole in One Licensee
- Within 4 – 7 years. No actions noted or implemented.

Until the whole Tapuaeharuru Bay Lakeshore Reserves Management Plan has been reviewed by Council then there is no authority provided to Council to consider the current application for the new development under the terms of a lease.

At best Council must start a review of all parts of the existing Management Plan.

The strike through/underlined version of amendments is only a partial review of the 79 page Management Plan and is not an acceptable solution. The Plan needs a full and complete review of all clauses and criteria.

10. Any new development on the Reserve needs to be further considered after the Plan has been reviewed. The Plan review must come before any developments are considered.

11. Regardless of the merits as things now are, any thing that is said or done may be regarded by the wokes as racist.

We are all part of the same community and all those in making a submission on this matter should be on the basis that the race of those who may be affected is unknown or ignored. All submissions should be 'race blind'.

If any Councillor has a concern or a view in that regard, then I request that the Councillor declare that now, as a conflict of interest, and withdraw from this Hearing.

Matters that relate to the Taupo Reserve lands are matters that concern the community and all ratepayers.

12. The Lake Terrace reserve is iconic and needs to be retained and protected in its natural state.

Over the past sixty plus years, the natural bush and fauna has been disturbed or removed. The existing trees make a pleasant environment for everyone to enjoy, all of the time.

More native plants could be added?

13. I also suggest that a 'permanent' freehold site be found for the 'Hole-in-One' activity. One not on a Taupo Reserve that has been designated and is set aside for the use and enjoyment of all ratepayers, the community and others.

A site that is already covered by the District Plan Objectives and Rules etc.

Summary.

- Council must review the 79 page Tapuaeharuru Bay Lakeshore Reserves Management Plan, with full public consultation.
- The Plan review must come before any developments are considered.
- The purpose of the Lakefront Reserve must be retained as is outlined in the Tapuaeharuru Bay Lakeshore Reserves Management Plan.
"The purpose of this management plan is to try and balance the provision of recreational opportunities that are relevant to the needs of users with the protection of the natural and cultural values of the lakeshore reserves, within the limits of the resources available"
- Reserve land is not the right place for commercial development or long term leases.
- The construction of permanent buildings and structures on the Lakefront Reserve is not an acceptable use for future licence holders.
- The Tapuaeharuru Bay Lakeshore Reserves Management Plan should not include provision for leases either in 2022 or in the future.
There are freehold sites within Taupo that are available for commercial buildings and leases.

Thank you for reading this submission

Feedback

Based on the proposal received from TMGHL, what further development would you like to see on the Hole in One site as outlined in Stage 1 and Stage 2?

NO further development of the site

Is there anything else about the draft Reserve Management Plan you would like to comment on?

(You can view the strike through/underline version [HERE](#))

I **STRONGLY OPPOSE** the redevelopment of the “Hole in one challenge” as proposed by Taupo Moana Group Holdings Ltd (TMGHL), or indeed any similar redevelopment along the waterfront reserve between the harbour and the old Sea Scout den. Taupo has a very valuable asset in having an open public reserve with such a magnificent view. As Canadian singer-songwriter Joni Mitchell sang (in Big Yellow Taxi) “you don’t know what you’ve got ’till it’s gone”. I have travelled overseas widely and have seen the effects of commercialization and buildings blotting out picturesque places. Lake Tahoe (U.S.A.) and Cancun (Mexico) come to my mind.

We have already seen what has happened at Two Mile Bay where a Sailing Centre on the reserve has gradually morphed into a pub. If **TMGHL** get approval I predict that we would see, in less than a decade, an expansion of the site and demands from other businesses for similar “developments” which would then be very difficult to refuse. No doubt the hoary old mendacities about jobs, fees and donations will be rolled out.

I ask that **no changes be made to the Tapuaeharuru Bay Lakeshore Reserves Management Plan**. I am also concerned that it appears ratepayer money has already been spent on drafting an amendment to the Plan, before public consultation has been completed. This is surely “jumping the gun” and giving people the impression that TDC has already approved the proposal in secret and the consultation is merely “window dressing”.

Should this inappropriate and adverse proposal be approved I demand that all the work be done at night so as to minimize disruption to the access and enjoyment of residents and visitors.

Feedback

Based on the proposal received from TMGHL, what further development would you like to see on the Hole in One site as outlined in Stage 1 and Stage 2?

Ticket office

Allowance for a food and beverage licence for on-site café

Public toilets

Public viewing deck with light weight roof for shelter (providing an all-weather facility for Hole in One golf)

Significant retaining of the bank that drops from the tee area to the foreshore

Access to waterfront

Potential reconfiguration of footpaths and public parking areas

Function/events space and educational centre that could be used by the wider community

Visitor centre for information about other attractions

Floating dock and operational hub/storage for on water activities

Include high aesthetic and cultural heritage qualities to become a focal point for the town centre and a project of cultural significance to Tūwharetoa

Do you have feedback on any of the proposed options listed above?

This area is going to undergo quite a significant upgrade with the new road layout. I think bringing up the hole in one area to a higher standard is necessary too. It is pretty budget currently, but in a prime spot. It certainly could be improved on. It's a big drawcard for the area, but the whole set up is basic. Make the area somewhere you want to go and spend time. There's amazing views and you can see how just the Love Taupo sign gets huge visitor numbers. Imagine if there was a nice area there with new flash facilities. Go for it.

Absolutely love the proposal for stage 1. This would serve hole in one and tourism as a whole in Taupo greatly. The cafe, viewing deck, toilets, etc. would be a brilliant addition to the lakefront if done thoughtfully and strategically. We are in complete support and celebrate Hole-in-One's pursue to improvement and excellence.

We are in complete opposition to stage 2, however, due to the fact that we cannot trust that small-town politics won't run the show. As a business owner in the Taupo Marina, this town is so entangled in politics and cutthroat behavior amidst owners/operators, that yet another visitor centre/booking office is the absolute last thing this town needs. Currently, there are three locations in town that take bookings. Our business is just over 2 years old and 2 of the 3 won't even book for us because of petty politics and the third is so wrapped around a select few operators' fingers that we have only gotten one booking from them since day one. We do not need another visitor centre/booking office affiliated with a group that has invested interest in select activities and cannot be trusted to promote and serve the entirety of Taupo tourism.

Additionally, the Taupo Marina deserves the spotlight when it comes to on-water activities and it has been sorely neglected in every way possible, from signage to infrastructure. Building a floating dock and operational hub/storage for on-water activities would be a direct attack against every single business in the Taupo Marina that is desperately struggling to survive. We cannot support this part of stage 2. Additionally, there are massive safety concerns with boats and kayaks

departing below the area where golf balls are being chipped and hit.

A sheltered area would work quite well for the attraction as well as the cultural heritage implemented around the area. Improving the site for comfort, aesthetics and safety is something I'd love to see.

However, I do not agree with the extensive plans TMGHL have for the hole in one site.

As other locals have said, it is adding too much and ruining our lakefront. A bigger site with more facilities would mean more traffic through this area, resulting in more litter, pollution and vandalism.

People love to sit in their cars, with their lunch and watch whoever is having a go at the hole in one.

Please consider all angles, the land, the water and people when developing this site. A simple upgrade of the area is all that is needed.

It would be a real shame to build such a large centre for the Hole in One along the lakefront and I don't think it is needed, it will spoil the look of the lakefront. Personally the Hole in One bus needs a paint job to liven it up, it's looking a tad tired.

What people live about the site is the open rawness about it. You are challenged by the elements of nature.

I believe the site should be left as it is.

Once you start building and therefore blocking access to the lake, whether that is visual or actual you are taking away nature from us all. It would set a dangerous precedent and one I believe does not benefit the area.

Not everything in life should be about money making.

Let nature be, and let it remind us to work in harmony with it, to show respect, to let people have the beautiful freedom to interact with our Lake. Not to have to pay to see it.

This is ridiculous, with all the crisis happening in Taupō we are spending money on a shelter for golfers?

We have a golfers range if they want shelter, why not focus on what Taupō really needs our Taonga placed at important sites of significance to show who we are as an iwi.

The signs welcome to Taupō are pathetic, we being Ngati Tuwharetoa are a grain of sand besides the Rick Cooper, Trevor Reid, Penny Homes etc etc

They are providing for their people and Tūwharetoa wants to build shelter to hit a ball in the water for their people .

Awesome NOT get your head out of the sand get our story on the screen in town, tell the people who we are, put the MANA back in TAUPŌ am shocked this was even proposed sounds like a pakeha idea, who owns this .

Am happy to speak to it if need be and if im available .

NO further development of the site

Do you have feedback on any of the proposed options listed above?

My submission against any development has three main reasons;

1. Mental well being
2. Litter and mess on the footpath
3. Encouraging tourists into Taupo and locals to go down town

We walk past the current hole in one business on a regular basis to go to town and use the shops / cafes / restaurants and thoroughly enjoy being able to see the lake and mountains uninterrupted. It is excellent for my **mental well being**. I would request that this development does not go ahead. It is especially useful to have uninterrupted views when under any covid restricted guidelines. I feel that any development at this commercial business that impinges in any way on the clear uninterrupted view from the lake front to the lake and mountains would be a backward step in terms of well being and enjoyment of the views.

There currently is limited parking which is a good thing as the lake front should be kept clear of large amounts of customer vehicles. The main reason is the **litter** that is created by having parking spaces directly looking over the lake, where people park up and tip their rubbish out the window and / or feed the gulls, who then make a **mess on the footpath**. As an example look at the litter and messed up footpath where cars can park opposite the miniature golf operation. We are supposed to be keeping the lakefront clear of litter and gulls mess to **encourage tourist to come to Taupo and locals to come down town** (for the tourists that come specifically for the hole in one the current facility meets that need, in my experience it is hardly ever completely full and people can get on to play when they want to).

If there is to be a hole in one operation there, it should be left at its **current size** with no interruption of lake views from the walkway, lake terrace or across the road in the tourist motels / b&b operations.

Is there anything else about the draft Reserve Management Plan you would like to comment on?

(You can view the strike through/underline version [HERE](#))

Please don't change it to accommodate any changes to the current commercial operation hole in one.

Based on the proposal received from TMGHL, what further development would you like to see on the Hole in One site as outlined in Stage 1 and Stage 2?

Ticket office

Allowance for a food and beverage licence for on-site café

Public toilets

Public viewing deck with light weight roof for shelter (providing an all-weather facility for Hole in One golf)

Significant retaining of the bank that drops from the tee area to the foreshore

Potential reconfiguration of footpaths and public parking areas

Include high aesthetic and cultural heritage qualities to become a focal point for the town centre and a project of cultural significance to Tūwharetoa

Do you have feedback on any of the proposed options listed above?

Yes, I am in favor of:

- A new ticket office for the Hole in one sounds like an amazing idea. They've been working out of that van for who knows how long, and so a proper ticket booth for them is long over due.

- A viewing deck with light weight roof would also be a great addition to the hole in one. there are a couple lookout points along the lake for enjoying Taupo's stunning views and this location would be another ideal spot for a lookout. And to make the Hole in One an all-weather facility would be great, Taupo needs more rainy day activities, or just a little shade to make the it more comfortable on those hot summer days.

- Additional infrastructure to host a café with a food and beverage license and public toilets all sounds like a great idea for this location as well. Firstly, there definitely are not enough public toilet spaces in Taupo, and only the one on the lake front all the way on the other side. A little café would do just fine here as well adding to a sweet overall lakefront experience.

- With all the potential new infrastructure it would make perfect sense to reconfigure the footpaths and public parking areas where need be. The paths would definitely need to continue to provide a clear cut through for bikers, scooters and runners passing by or through the area. And the reconfiguration of the parking lot could be really good for the Hole in One, maybe even increasing the amount of spaces.

- To Include high aesthetic and cultural heritage qualities, and projects with cultural significance to Tuwharetoa in and amongst all of the new infrastructure around the Hole in One would be so great. I love seeing all the Maori cultural expression in New Zealand.

- Since there is already a tiny beach access I'm sure some significant retaining of the bank that drops from the tee area to the foreshore could be good in order to help preserve the inevitable natural erosion that will occur in the years to come.

No, I am not in favor of:

- Access to the waterfront is "okay" off to the side where it is already established. But even there, or any closer to and around the Hole in One site doesn't really make much sense at all. Why would we allow beach access to potentially high risk areas around where golf balls are being hit, chipped and shanked towards? Even in the illustration given it looks very silly and completely unpractical to have pedestrians hanging out on the waterfront below a golf range.

- The infrastructure proposed under stage 1 seems very reasonable and even necessary (i.e. public toilets and Hole in One ticket booth), but to build an entire functions/events space and educational center and visitor center for information about other attractions would be much too substantial and unnecessary. Already the infrastructure proposed in stage one creates a bit of an eye sore to the natural beauty and aesthetics of the lake and its mountain backdrop; to provide an events/visitor center would mean substantial building which would greatly take away from the iconic Taupo view. There is also no reason for a new visitor center when there is already an ISite in Taupo.

- A floating dock and optional hub/storage for on water activities: **This proposal is by far the most unacceptable.** There is already such an amazing and well establish sector of town that is a one-stop-shop for any and all things to experience on our world class lake; The Taupo Marina and Boat Harbour. Yet it remains so hidden and neglected from the rest of town. Access to the marina is already extremally limited, and with the closing of Ferry Road to come with the new reconstruction of the lake front, access of the Taupo Marina will become merely inaccessible; leaving only redoubt street. There are numerous tourism attractions and operators who have worked their entire lives showcasing everything the lake has to offer, and to much benefit of the entire town, but the town hasn't done much help showcase the Taupo Marina and the operators who keep visitors coming back. To build a dock and water activities hub at the Hole in One lakefront would be utterly disrespectful to the entire marina, and completely undermine all the operators who have to work out of it. Instead of building a new hub for water activities, they should reconstruct and redirect visitors towards the Taupo Marina.

Based on the proposal received from TMGHL, what further development would you like to see on the Hole in One site as outlined in Stage 1 and Stage 2?

NO further development of the site

Do you have feedback on any of the proposed options listed above?

i disagree with the planned hole in one buildings and containers and shops and booking office this is the lakefront it should always remain free from tourist attractions and simply left to enjoy the view not make money making tourist buildings that block the view and how many more applications before the lakefront is full of businesses

Significant retaining of the bank that drops from the tee area to the foreshore

Access to waterfront

Potential reconfiguration of footpaths and public parking areas

Visitor centre for information about other attractions

Floating dock and operational hub/storage for on water activities

Include high aesthetic and cultural heritage qualities to become a focal point for the town centre and a project of cultural significance to Tūwharetoa

Do you have feedback on any of the proposed options listed above?

We are happy to see this development, which will be an asset to Taupo, but we believe it needs modification to ensure it is less visible from the road. The pump station to the east of the hole in one is a large building which is unobtrusive and demonstrates it is possible to have a building in the area. Admittedly the hole in one would need to have a more pleasing aesthetic form.

The proposed public viewing deck is very large, surely it could be smaller and be set in to the bank.

It is the natural beauty, not Lakefront buildings or side-show activities that make Taupo the gem it is. Of course many visitors will expect there to be such activities too, while they holiday. But there are surely many options for the relocation of the Hole-in-One where it can be undertaken without subtracting from the wonderful view of the lake and the mountains. We are developing the busy town center so that access to the lake is but a short walk away. The lake front should be a contrasting peaceful haven, natural, and magnificent. That makes Taupo special. Even the current Hole-in-One would be better located elsewhere, but the proposed center, both with respect to Stage 1 and Stage 2 is extremely sad to contemplate in that location. It would certainly degrade the view of the Lake. People driving from the South, or passing through Taupo from the North should have as uninterrupted a view of the Lake side for as long a stretch of Lake Terrace as possible. Choosing this location for an expansion of this fun, but trivial, activity disrespects the taonga that is our Lake.

The plans and illustrations show that the proposed structure will interrupt the stunning mountain views in that area of Lake Terrace both for locals and for passers-by not attracted to that activity. I strongly dispute the claim that this development would add high aesthetic and cultural qualities to the town center. On the contrary nothing can be more aesthetically pleasing than the natural uninterrupted views across the lake and on to the mountains. This development will destroy that great aesthetic worth. Whereas there is a fun aspect to Hole-in-One there is absolutely no cultural heritage quality attached to this activity. I am genuinely puzzled that the Tuwharetoa Maori Trust Board would damage the taonga that is Lake Taupo in this way. A dedicated cultural Centre in Taupo would be welcome, but certainly not at this location, and there is no logical or cultural reason for it to be associated with this particular commercial activity.

The required change from License to Lease to facilitate and cement such an undesirable use of this precious area of Lake front is of considerable concern. The foreshore side of Lake Terrace should be free of commercial enterprises to preserve the natural beauty of our town for residents, ratepayers, and visitors alike..

Please, please Council and Tuwharetoa Maori Trust Board, locate all the proposed Stage1 and Stage 2 developments elsewhere.

File
TDC Hole in One 2203

I strongly oppose the redevelopment of Lake Taupo's Hole in One Challenge site.

In making this submission I refer to the Tapuaeharuru Bay Lakeshore Management Plan. The primary piece of legislation guiding this plan is the 1977 Reserves Act and this fits alongside the Resource Management Act 1991. In each case there is a requirement to preserve and manage the areas, retaining their natural character and landscape values for the benefit of the public and to retain access for the public.

Simply put, the intent of the Tapuaeharuru Bay Lakeshore Management plan is to balance recreational opportunities with the protection of natural and cultural values of the lakeshore reserves.

As a long-term resident I have seen many changes in our wonderful town celebrated for its natural beauty, sparkling lake waters and stunning landscapes. These are natural assets which if not protected and honoured will be lost to commercialism and sprawling man-made interruptions to the open publicly-accessible reserve. Truly, a van is less of an eye-sore than any permanent building might be. If people want an indoor activity when the weather is bad, there is a huge multi-choice centre near the airport. We don't need the Hole in One expanded.

If an events and interpretation centre is wanted, let's build it in a site which does not detract from the lake's beauty so residents and visitors can be proud as per the outcomes listed in The Taupo District Long-Term Council Community Plan (LTCCP). As a suggestion, there's space up Spa Road near the Venture Centre, near A C Baths and the Events Centre.

Unfortunately, there is a pre-existing licence which has set a precedent – The Two-Mile Bay Sailing Centre. This enterprise which has been gradually encroaching the foreshore and the bay began over 30 years ago as a simple enterprise with a few mini-America's Cup boats. Today there is a licence for alcohol and sailing has a much-lesser focus. In a recent upgrade Council diverted the Lakeshore path to allow more and more space for patrons to sit about and larger floating buildings are pushing into the lake. To be honest this enterprise to me is tacky and I do wonder how the sprawl has been allowed to happen.

It disturbs me to read the Council staff have already used our ratepayer money to draft an amendment to the plan ahead of and likely pre-empting the outcome of public consultation on the Hole In One redevelopment.

Finally, our lake and the landscape values are what makes our area special. It is up to us as caring residents to protect these beautiful, natural assets. **There must be no buildings on the Lakeshore Reserve.**

Hi

I think the idea is great but does not go far enough. My thoughts

1 -- Drop the level of the floor of the hole in one by about 3 m ,so no views are obscured.

2 -- Have a further 2 levels below that for a good cafe and restaurant. one only has to look at the success of the two mile bay sailing centre to see there is a demand for a quiet cafe beside the water. Imagine the sunsets as you have dinner beside the water

One floor as an events space.

3 -- Take the footpath/cycle way down a boardwalk ramp (or cut into the cliff) to the lowest (cafe) floor level. Going to the east it could pass the water treatment plant and come up the access road to the plant. To the west it would gently rise (max 10 %) to hit ground level somewhere in front of the Roberts street cafes.

Alternatively take it all the way to the yacht club. The more that Footpath/cycleway can be taken

away from the road the better.

4 -- Rather than just a floating dock maybe a jetty with floating dock at the end ,so people can walk out over the water. Feed the trout maybe?

5 -- The design would be quite simple . The back wall to each floor would be retaining held at the top be the floor above.

The site is special and justifies a really good development far beyond what has been so far proposed.

It might require the development to be a joint Tuwharetoa TDC venture

An interesting historical note -- About 30 or more years ago the Council had a competition to design a concept of a future Taupo.

Timi Te Heuhue, Felicity Campbell, Steve Benefield and I put in a proposal. Included was a Jetty and Entertainment options about in this location

Re: Tapuaeharuru Bay Lakeshore Reserves Management Plan (Hole in One site)

Thank you for the opportunity to provide a submission to the proposal for the redevelopment of the Hole in One site by the Taupo Moana Group Holdings Limited (TMGHL) on the Taupo Lakefront.

This submission is prepared on behalf of Mr. Patel, who owns the Motel (Acacia Lakeview Motel) directly opposite the site and as such has a greater interest than the general public to the development in terms of its effects on his business.

Mr. Patel is in **opposition** to the proposal.

Mr. Patel purchased the Motel five years ago and since has completed renovated the existing Motel on the right-hand side of the above picture and built a completely new wing as shown on the left, an investment in the millions of dollars.

This development has provided valuable new quality lakefront accommodation to Taupo with one of the key attributes being the uninterrupted view across Lake Taupo and to Tongariro National Park in the south. The Motel's continued success lies in uninterrupted views of lake and mountain views and any change will have a significant impact on the business.

Mr. Patel investigated the Reserve Management Plan when purchasing the property and was given certainty

to undertake the significant investment based on the understanding that no new permanent structures could be erected on the reserve. Also given the site was operated under a licence, rather than a long-term lease, this provided additional security that the activity was not permanent in nature.

Mr. Patel is supportive of tourism development and the Hole in One Golf activity but considers that the current location is not conducive to permanent structures. One of the key attributes to the Lakefront is the lack of permanent structures that provides for uninterrupted views and provides a high level of amenity and public shared space. The proposed structures will take up a significant portion of space, not only for the structures but associated parking and buses utilising the area, this will be to the detriment of users to the public space.

Mr. Patel is also concerned about the precedent being created by converting the licence to a lease. This is in effect privatising reserve land for purely commercial use, which is contrary to not only the current Reserve Management Plan but the Reserves Act 1977:

Section 17(1) It is hereby declared that the appropriate provisions of this Act shall have effect, in relation to reserves classified as recreation reserves, for the purpose of providing areas for the recreation and sporting activities and the physical welfare and enjoyment of the public, and for the protection of the natural environment and beauty of the countryside, with emphasis on the retention of open spaces and on outdoor recreational activities, including recreational tracks in the countryside.

The purpose of the Lake Taupo Foreshore Reserve is to provide for this open space and outdoor recreational activities, which the current licence and activity by the Hole in One can provide under the current terms. It is considered that a permanent structure of the magnitude proposed will be contrary to the purpose of the reserve and intent under the Reserves Act 1977. Any long-term lease would effectively relinquish control of a public asset.

There are also additional concerns related to the proposal, such as the liquor licence being within an alcohol ban area where young families frequent. The purpose of the Sale and Supply of Alcohol Act is to limit exposure of alcohol to young people and so any future liquor licence would increase exposure in a high use area of children.

Further there are concerns that this will turn into a new I-Site and create additional traffic and parking issues in an area that already has traffic safety concerns. There is limited parking in this area and an increased use of the site of other associated activities will only create more conflict and safety issues. In terms of safety, there is also conflict with users of the lake and beach below the site, where people are legitimately accessing public areas and being put at risk from the strike of a golf ball. Again, this supports another more appropriate location being considered for the long term of the Hole in One.

Finally, Mr. Patel would like the submissions and recommendations to amend the Reserve Management Plan heard by independent commissioners. This is due to previous presentations by Taupo Moana Group Holdings Limited receiving extremely strong support in previous workshops and therefore it is considered that the decision is already predetermined and as such those Councillors should be excluded from any formal decision making.

Mr. Patel wishes to speak in support of this submission.

Kind regards

Scott Devonport

Based on the proposal received from TMGHL, what further development would you like to see on the Hole in One site as outlined in Stage 1 and Stage 2?

Ticket office

Public toilets

Significant retaining of the bank that drops from the tee area to the foreshore

Potential reconfiguration of footpaths and public parking areas

Do you have feedback on any of the proposed options listed above?

On the whole I support Tūwharetoa's desire to upgrade their current Hole in One offering but not entirely in the manner which they are proposing.

Firstly, I do not support the idea of having an above-ground shelter. This part of Tapuaeharuru Bay Lakeshore Reserve is already narrow with the carpark onsite and even if the carpark and footpaths were reconfigured my feeling is that an above-ground structure would clutter this space even further – particularly as there is a suggestion that the overall structure will be visible from a distance (referring to your consultation supporting document titled 'Applicant's presentation to committee November 2021' page 11, point 7).

I do not believe that the shelter structure, in its proposed (stage 1 or 2) form, would be aesthetically pleasing as I cannot see how it would sit well with the land and its surroundings given that one of the most unique aspects of our Lakeshore Reserves is that the vast majority are free from structure, with un-interrupted views of Taupō moana and our maunga.

Instead, what I would like to see is this shelter structure being built into (possibly even in front of and out from) the embankment/hillside, allowing the roof of the shelter structure to become a viewing platform at footpath/road level. There could be structures on the viewing platform that double as both viewing portals to the tee boxes below and also benches/tables for the public to rest on/against while enjoying views of both Taupō moana, our maunga and the golf.

An example of such a platform already exists further along the Lakeshore where the water treatment plant building has a viewing platform at road level as its roof. This viewing platform invites people to the space. As would such a platform on top of the Hole in One site.

The 6 metre height of the embankment/hillside (refer to your 'Applicant's presentation', page 6) still allows the tee boxes to be at an appropriate height above the lake level for the golfing activity.

I'd propose that the café be built at the same level as the tee boxes (between road level and water level) which would allow views to the water, Hole in One and tee boxes – simply at a lower level. Customer queuing could run alongside the sheltering structure from the roadside/footpath down towards the lake (same initial route to beach and water-front activities) with the public toilets and golf sales office etc forming part of the shelter structure (public toilets and activities storage could be housed behind the tee boxes).

Foreshore stabilisation works and retaining to the embankment/hillside could be combined with the shelter structure build. Any works undertaken on the site would obviously need to take into consideration the location of the storm water pipe in that area.

I acknowledge and applaud the desire of Tūwharetoa to recognise their heritage and values while redesigning the Hole in One offering but disagree with any attempt to make this a site of cultural significance (to tell their story – refer to your 'Applicant's presentation', pgs 11, 20 et al). I would personally rather see Tūwharetoa tell their story by redesigning the area around the existing Reid's Carving waharoa at the bottom of Tongariro Street (with obvious permissions) – this seems a much more appropriate place to present a site of cultural significance as it stands on its own, with space to reflect and acknowledge Tūwharetoa heritage free from other distractions.

Having said all that, if Tūwharetoa still chose to tell more of their story at the Hole in One offering, it could be designed into the viewing platform and alongside the queuing area, making it clearly visible to passers-by, golf punters, those enjoying a visit to the café and those on their way down to the lakefront.

Which brings me to my second point of concern which relates to public access to the waterfront and the possibility of a beach activities deck below the tee boxes (refer to your 'Applicant's presentation', page 11 point 4). A comment on page six of your 'Applicant's presentation' states: *many stray balls fall on the 'beach' in this area and the attendant must often advise visitors to take care.* I'd be very concerned that if members of the public were allowed access to the beach directly below or in the near vicinity of the tee boxes they could be struck by a miss-hit/stray ball.

And while I like the idea of beach access, the floating dock and the possibility of future water-front activities I'd definitely like to make sure that the route to the beach (if it were to go ahead) steered well clear of the tee boxes and I would also like to know how Tūwharetoa plan to mitigate the risk of injury to the members of the public should a golf-ball head off-course.

I have absolutely no problem with the creation of commercial competition but I feel that perhaps Council would be better off supporting efforts to cater for other water sports activities at more appropriate places - away from golf-ball hazards. The Taupō Yacht club and Lake Taupo Sea Scouts are two such sites and there is scope within the Lakeshore Management Plan Adopted 2008 (provided as one of your consultation supporting documents) for this to happen (see pages 31 & 50).

Is there anything else about the draft Reserve Management Plan you would like to comment on?

(You can view the strike through/underline version [HERE](#))

Page 3, under title 'Key Actions': the 'Concession Site Location Permitted Activities' list for point 1. should be updated to include the sale of non-alcoholic beverages and/or food (and possibly also reference non-motorised water sports) to be consistent with the activities list proposed to be added (top of page 2).

We are in support of development that supports business growth, prosperity and vitality in the District. We would like to have a better understanding of what, if any, plans are in place in terms of guidelines for development of the lake edge sites.

Attached Documents

File
TBC Submission - Hole In One

Submission to Tapuaeharuru Bay Lakeshore Reserves Management Plan (Hole in One site)

Prepared: March 2022

Submitter: Taupō Business Chamber

Address: PO Box 2377, Taupō, 3351

Email: info@taupo-chamber.co.nz

The Taupō Business Chamber is a local & independent voice for business in the Taupō District (District). We exist to promote business growth and vitality across the District.

We represent approximately 230 members who collectively employ over 1500 staff.

Taupō Business Chamber considers that business growth, prosperity and vitality in the District is crucial to maintaining a prosperous and liveable District that supports the wellbeing of our whole community.

Based on our preliminary assessment of Taupō Moana Group Holdings Limited's (TMGHL) presentation document and the Tapuaeharuru Bay Lakeshore Reserves Management Plan Hole In One Site Consultation Document against our Advocacy Manifesto we would like to submit the following and to request a slot to speak to these at your hearings.

1. The Taupō Business Chamber is writing to support the application from TMGHL to develop the Hole in One site they occupy on the Taupō lakefront.
2. We support the TMGHL application as we consider the growth of the Taupō region by way of increased commercial opportunity and the meaningful development of our greatest asset being Lake Taupō will greatly contribute to the local economy and thereby contribute towards our goal as a Business Chamber to support business growth and vitality through the Taupō region.
3. The development of the lake edge is critical, in the opinion of the Taupō Business Chamber, to the economic future of Taupō. Developments such as this proposal by TMGHL are required to not only further develop Taupō into a world class destination of choice but to compete in the highly lucrative domestic tourism market.
4. We acknowledge that this stage of the application is limited to changing the Reserves Management Plan to enable the proposed development and the associated change in allowable activities. We acknowledge that the development of the site will also be subject to TMGHL being granted the required resource and building consents which will be subject to a separate public consultation process. Notwithstanding, we take the opportunity to raise the following:
 - a. We would like to have a better understanding of what, if any, plans are in place in terms of guidelines for development of the lake edge sites outside of the District Plan restrictions. While we would not necessarily want to see the project held up while such plans are developed, we consider a comprehensive set of development guidelines will be critical for future development of lake edge sites.
 - b. We encourage the developers to consider using local business in the construction and development phase as a way of generating local economic opportunity i.e. jobs.
5. As part of our submission process, we asked our members to provide feedback on the TMGHL application that could be included in our submission. Of the 30 responses received 18 supported the change, 10 opposed the change and 2 sought amendment. The feedback received supports the board's position to support the TMGHL application. Notwithstanding, we take the opportunity to raise the following:

- a. Respondents on the whole either supported this specific development and wanted more such initiatives or did not support lake edge development at all. No comments were received specifically relating to the proposed changes to the Reserves Management Plan.
- b. The two respondents who sought amendment considered the proposed development to be too large – something that we consider would be looked at in resource and building consent stages. These comments support, in our opinion, the need for development guidelines for lake edge sites.
- c. Several comments of those not in support followed the theme that Taupō is known for its natural beauty and the lake edge should be left development free. In our opinion these comments:
 - i. serve as a reminder of the balance that will be required between economic opportunity and public approval when a development is approved on a lake edge site; and
 - ii. provide further support for development guidelines for lake edge sites.

We look forward to speaking to our submission in April and expanding further on these points as required.

Regards

The Taupō Business Chamber

Tapuaeharuru Bay Lakeshore RMP - Tuesday, 5 April 2022 Zoom link will be sent to speakers, Virtual hearing & livestream

Additional requirements for hearing:

Feedback

Based on the proposal received from TMGHL, what further development would you like to see on the Hole in One site as outlined in Stage 1 and Stage 2?

Ticket office

Public toilets

Public viewing deck with light weight roof for shelter (providing an all-weather facility for Hole in One golf)

Do you have feedback on any of the proposed options listed above?

In the supporting document 'Applicant's presentation to committee November 2021', the submission contains two stages; Stage 1 - Hole-in-One redevelopment - and Stage 2 - redevelopment of the entire site "into a multi-functional facility"; a Café, Functions and Educational Centre. It would also include access to the foreshore, provide a floating dock and supply access for other activity providers.

The application shows varying concept options for Stage 2, ranging from minor modifications to the proposal for the Hole-in-One, through to large scale buildings.

I submit that Stage 2 is incompatible with Stage 1 and should be fully separated.

The Stage 1 proposal is, in my opinion, a good development of the existing facility and will maintain the general 'transparency' of the existing lake edge.

Stage two, however, is different.

- As said above, the Stage 2 proposal is incompatible with the Hole-in-One facility. Unless the applicant is to provide the public with hard

hats and kevlar vests, to have public access immediately below and in front of the Hole-in-One is nonsensical. Regularly, golf balls are mis-hit and land in the foreshore area. Furthermore, to meet current health and safety legislation will be extremely difficult under this proposal.

- Traffic management for the Café, Functions and Educational Centre will also be a challenge, as this section of Lake Terrace is constricted and busy.
- The Stage 2 building, if in the form/scale of the examples shown on the applicant's document, will provide a significant block to sightlines, both along the lakefront and from buildings behind; view lines are currently largely unimpeded and this is a precious asset to be maintained.
- A large building at this location would not integrate with the rest of the Taupo lakefront; it would look out of place.

For the reasons above, I cannot support the application while it includes both Stage 1 and Stage 2. In my opinion, Stage 2 should be separated out. I submit that a much more appropriate location would be within the lakefront redevelopment as part of the Taupo Town Centre Transformation. To quote from the Taupo Town Centre Transformation document:-

“Roberts Street and Lake Terrace will be transformed into a people friendly environment. This is our opportunity to create a world-class waterfront and better connect people to our lake and beautiful environment.”

Surely this is the location for the Café, Functions and Educational Centre. At this location, it would be in the hub of our new dynamic ‘people area’. It would also link into the benefits of the Town Centre Transformation, as stated by Council:-

“Turning our CBD into an area with quality places, that puts people-first, is a critical part of attracting locals and visitors alike to spend time in the town centre, with huge social and economic benefits associated with that.”

We should focus on this, rather than taking people to an isolated facility away from the newly revitalised CBD. Furthermore, traffic management will be a much less of a problem in this area, with extensive parking already available in the town centre and towards the boat harbour area. It would also not compromise the existing Hole-in-One facility.

In summary, while I consider the Stage 1 Hole-in-One proposal to be good, I cannot support the overall application while it includes the Stage 2 proposal. The two should be separated and the Stage 2 facility relocated.

File
TDC Town Centre Transformation Excerpts

Benefits

This \$20.6 million funding injection will provide an important economic and social boost for our district, including providing the equivalent of 92 full time local jobs over the next two years.

Turning our CBD into an area with quality places, that puts people-first, is a critical part of attracting locals and visitors alike to spend time in the town centre, with huge social and economic benefits associated with that.

It is about connecting the CBD to its surrounding environment and utilising what we are so blessed to have here – a beautiful lake and a real opportunity to create inviting, attractive spaces.

It will create opportunities for public/private investment and cooperation by creating places where people want to meet to do business and enjoy the social atmosphere.

“

**THIS IS A ONCE IN A LIFETIME OPPORTUNITY TO CREATE A
WORLD-CLASS TOWN CENTRE AND WATERFRONT
THAT ATTRACTS PEOPLE TO LINGER LONGER AND INVEST IN
OUR DISTRICT.**

- MAYOR DAVID TREWAVAS

”

Lakefront

Roberts Street and Lake Terrace will be transformed into a people-friendly environment, including one-way traffic along this important stretch of town. This is our opportunity to create a world-class waterfront and better connect people to our lake and beautiful environment. Construction on this part of the project is expected to begin later in 2021 and we will be sharing more information with the community about this exciting part of the project over the next few months.

First name: Verna

Last name: Cook-Jackson

Would you like to present your submission in person at a hearing? *

I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

Feedback

Based on the proposal received from TMGHL, what further development would you like to see on the Hole in One site as outlined in Stage 1 and Stage 2?

Ticket office

Allowance for a food and beverage licence for on-site café

Public toilets

Public viewing deck with light weight roof for shelter (providing an all-weather facility for Hole in One golf)

Significant retaining of the bank that drops from the tee area to the foreshore

Access to waterfront

Potential reconfiguration of footpaths and public parking areas

Include high aesthetic and cultural heritage qualities to become a focal point for the town centre and a project of cultural significance to Tūwharetoa

Do you have feedback on any of the proposed options listed above?

I regard the proposed redevelopment of the site as an opportunity for the town to showcase the lake and it's environs.

As a ratepayer who lives almost on the lakefront it would be nothing but a total enhancement to what is presently a 'tacky' and messy operation.

As a ratepayer I feel extremely proud that the present users of the site have had the forethought to looking at it's future and developing a world class facility.

I do not seeing the proposed development as being negative on the eyeline, but an enhancement of the lake front that is presently under resourced and even looks unkempt and messy to visitors to the town.

Is there anything else about the draft Reserve Management Plan you would like to comment on?

(You can view the strike through/underline version [HERE](#))

I consider the proposal a fully meritted one that will have ongoing benefits for Taupo:.

- for the commercial and retail users of Taupo,
- for the people who live in Taupo,
- for visitors to Taupo, for the tangata whenua,
- for future employment of Taupo youth - and not so youth
- for the protection of the lake bank
- as an added facility for the encouragement and education both local children & local adults of the importance of the lake's mana, history, uses and importance of caring for it and the environment about it.

As mentioned in the previous question - this is a world class proposal. It would enhance, not un-enhance the lake shore and lake front.

The design is in keeping with blending with the environment.

This town has recently won the Most Beautiful Large Town award - and is presently ungoing major reconstruction of roadways in and around the town to further enhance the attraction of the town - to both residents and visitors. This Hole in One proposal literally goes hand in hand in making the town become even more people friendly, environmentally friendly and beautiful.

I congratulation the Trust that has had the forethought to look to the future and ensure the town can have something further to be proud of, to enhance the area and to compliment the soon to be newly laid out town centre.

Feedback

Based on the proposal received from TMGHL, what further development would you like to see on the Hole in One site as outlined in Stage 1 and Stage 2?

Ticket office

Allowance for a food and beverage licence for on-site café

Public viewing deck with light weight roof for shelter (providing an all-weather facility for Hole in One golf)

Significant retaining of the bank that drops from the tee area to the foreshore

Access to waterfront

Potential reconfiguration of footpaths and public parking areas

Function/events space and educational centre that could be used by the wider community

Visitor centre for information about other attractions

Floating dock and operational hub/storage for on water activities

Include high aesthetic and cultural heritage qualities to become a focal point for the town centre and a project of cultural significance to Tūwharetoa

Do you have feedback on any of the proposed options listed above?

This is a long standing iconic Taupo business that is wanting and willing to invest in its operation at a time when the tourism sector has been struggling. There are many positive outcomes from the above proposed submission for the Taupo region.

I speak on behalf of the Landl family and we support Taupo Moana Group Holdings Limited to develop their business at the Hole in One on the Taupo Lakefront.

Is there anything else about the draft Reserve Management Plan you would like to comment on?

(You can view the strike through/underline version [HERE](#))

I cant see anything that mentions a right of renewal for the existing owners? Surely there would be a right of renewal offered once the 33 years is completed?

Further consideration should be made around pedestrian management and ensuring safe access for families and less abled people.

We should never miss the opportunity with our town developments to tell our cultural story of our very precious whenua, maunga and moana. RAL advocates for strong cultural heritage inclusions in the final development such as pou to tell the story

TMGHL Letter of Support HI1

Monday, 14 March 2022

The Chief Executive Officer
Taupō District Council
Private Bag 2005
Freeport No. 112497

Communication via email – Online Submission taupo.govt.nz/consultation

Dear Gareth

Thank you for the opportunity to provide feedback on the Taupō Moana Group Holdings Limited (TGMHL) proposal to develop the Hole in One site they occupy on Lake Terrace on the Taupō lakefront.

Ruapehu Alpine Lifts (RAL) applaud TGMHL for their foresight and vision in the further development of this key tourism site in Taupō. The commitment and dedication that TGMHL have towards the tourism fabric of Taupō is well established and mature. RAL have no doubt that this proposed expansion of this venture will continue to yield positive results for the sector in the future. This venture is iconic and unique to Taupō and it should be given every opportunity to be enhanced and opened up to both local residents and tourists alike to ensure we continue to attract visitors to our lakefront.

The opportunity to enhance this site should be viewed beyond the economic benefits to the operator. The benefits of this development reach further than Tourism and provide the public with an outdoor recreational opportunity that will be vital in the towns post COVID recovery. Significant evidence has been presented around the inherent benefits of outdoor recreation to stimulating the body's natural immune system and increasing the mental health of outdoor recreation users around the world.

We strongly advocate the amendments to the Tapuaeharuru Bay Lakeshore Reserves Management Plan to accommodate the proposed changes outlined in the consultation document to ensure the development can be approved and put forward for further consent considerations in the future.

Sincerely

Jono Dean
Chief Executive Officer
Ruapehu Alpine Lifts

I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

Feedback

Do you have feedback on any of the proposed options listed above?

I would happily support the proposed development if it can be completed as indicated in the Taupo & Turangi Weekender of March 3, 2022. The noted view that it would interfere with views does not seem to bear out. The two accommodation properties on the other side of the road being, Acacia Lake View and Absolute lake View, do not have their accommodation units facing the Lakefront. Therefore, in my opinion, they would not be impacted.

As someone who worked in the NZ travel and tourism industry for 44 years I would expect this development to be an enhancement of the lakefront from the present set up for the Hole in One operation. I do not see any negative factors that would impact on the residents of Taupo. I do see an opportunity to improve an attraction for tourists and out of town visitors that is already popular.

Feedback

Based on the proposal received from TMGHL, what further development would you like to see on the Hole in One site as outlined in Stage 1 and Stage 2?

NO further development of the site

Do you have feedback on any of the proposed options listed above?

I am very against any building on the lake front. Allow one next there will be 2 or 3. Those motels paid for their views, any building would obstruct it, as it is we all can enjoy the beautiful view of the lake and mountains without looking around buildings.

Is there anything else about the draft Reserve Management Plan you would like to comment on?

(You can view the strike through/underline version [HERE](#))

No buildings on the lake front.

I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

Feedback

Based on the proposal received from TMGHL, what further development would you like to see on the Hole in One site as outlined in Stage 1 and Stage 2?

Potential reconfiguration of footpaths and public parking areas

Do you have feedback on any of the proposed options listed above?

Quick background to establish relevance of my submission. Have been living in Taupo permanently for 15 months, previously had holiday home for 5 years, prior to that was a regular pass through visitor, used cafes, toilets etc. I am preparing this submission at very short notice so have been unable to research to prepare supporting info.

I am fortunate enough, prior to Covid, to have done some travel overseas and seen both the joys and sadness of tourist development.

Very against cafe and public toilets in this area. Public toilets are not needed. Plenty in Taupo. Patrons can go to the toilet before they get in the queue and play their golf. Even allowing 1 1/2 hours to wait and play they don't need a toilet. A good cafe is a great thing but there are plenty in town. Overseas where on coast or lakeside development has taken place (usually in the past as developments of this kind are against current environmental thinking) the buildings start to look shabby. When things are quiet they look run down. Public toilets alongside a cafe will look disgusting, extensive work and space is needed to keep access to toilets nice (such as the toilets down near the scout den). Let us not forget these two buildings alone will blemish the beautiful view of the foreshore and lake itself. For years I have called through Taupo, never taken the bypass, to have a coffee, bite to eat and then a walk or even just a drive along Lake Terrace if time was short to see the beautiful lake, not to look at public toilets and cafes and certainly not to look at visitor centres, event and educational centres. These latter places are for events and education - they don't require a waterfront or a view. Just buildings that become shabby, construction styles date and the lakeside lost for ever.

Frankly the Trust should have looked at how they could "develop sustainable commercial activities" when they were looking at buying the Hole in One, rather than buying it and now trying to change what Taupo is all about. ie a Lake. Not a Hole in One golf facility. Don't get me wrong I have played the Hole in One, it is pretty much a Taupo icon, but that doesn't mean it needs to turn

into something quite different. The need to change the Lakeshore Management Plan is a clear statement of substantial change being sought. All the buildings being suggested could be across the road on an empty site there. Perhaps the Trust could buy that land. However the cafe, the event centre, educational centres, visitor information centres all are elsewhere in town and don't need lakeside land.

The Trust has mentioned the bus being shabby. Jazz it up, buy a new one, get with it, a lot cheaper than the proposed development. Their return on investment will probably be higher too. Loading and unloading the bus each day may take some work as they say, but hey, work is required to earn money, the exercise is good for people. Improved queueing areas could be done, an extra staff member to ensure public line up, perhaps a small redevelopment of the footpath at that queueing corner. Visitors wear hats these days, we don't need a cover over the queueing area.

Is there anything else about the draft Reserve Management Plan you would like to comment on?

(You can view the strike through/underline version [HERE](#))

Not enough time to comment on the draft Reserve Management Plan but a reminder of the Reserves Act 1977 and the Resource Management Act 1991 that the original Plan is based on.

Reserves Act 1977

The Reserves Act is the primary piece of legislation for administering reserves.

The purpose of this Act is:

- providing for the preservation and management of areas for the benefit and enjoyment of the public
- ensuring, as far as possible, the survival of all indigenous species of flora and fauna
- ensuring, as far as possible, the preservation of access for the public
- providing for the preservation of representative samples of all classes of natural ecosystems and landscape
- promoting the protection of the natural character of the coastal environment and the margins of lakes and rivers.

Nothing here about commercial activity.

Resource Management Act 1991

The Resource Management Act is a regulatory tool which applies to the management of land. The purpose of the Act is the sustainable management of natural and physical resources. Section 6 (Matters of National Importance), section 7 (Other Matters) and section 8 (Treaty of Waitangi) set out matters that are of importance to the management of land.

Of these, the following are particularly relevant to reserve management:

- preservation of the natural character of the coastal environment, wetlands, and lakes and rivers and their margins, and their protection from inappropriate subdivision, use, and development
- protection of outstanding natural features and landscapes from inappropriate subdivision, use, and development
- maintenance and enhancement of public access to and along the coastal marine areas, lakes and rivers
- the relationship of Maori and their culture and traditions with their ancestral lands, water, sites, waahi tapu and other taonga
- kaitiakitanga
- maintenance and enhancement of amenity values
- maintenance and enhancement of the quality of the environment.

Lake Taupo is an area of outstanding natural beauty and is a significant and special area of both New Zealand and the World. Let us leave it that way.

Feedback

Based on the proposal received from TMGHL, what further development would you like to see on the Hole in One site as outlined in Stage 1 and Stage 2?

NO further development of the site

Do you have feedback on any of the proposed options listed above?

The view over lake and mountains should not be spoilt by any buildings.

There are good existing toilets at harbour and to east on Lake terrace.

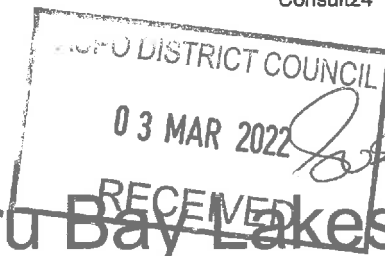

There are an adequate number of cafes within walking distance of Hole in One Challenge.

I object to the earthworks that would be necessary to get access to the lower level near lake.

I am surprised that Tuwharetoa Iwi, with its love for the mountains and lake, would want to expand the operation.

NO further development of the site

Do you have feedback on any of the proposed options listed above?

I find the proposal most abhorrent, a black day in the history of Taupō. Taupō is internationally renowned as a tourist town with tremendous views towards the central volcanic region of Ruapehu, Tongariro, Ngauruhoe and surrounding areas What are the diners on Roberts Street going to see if this proposal to build a tin shed eventuates? The area is steadily being discredited by coffee carts and scooter hire. If this process continues we will see a continuous barrage of commercial structures earning a few wealthy owners their share of paradise and a stolen income.

The land and view belong to the people of Taupō and our visitors. The view is iconic without foreshore owners.

There is another aspect which deserves attention.

The intention of the tin shed is to draw more visitors both on foot and vehicular. Lake Terrace is a beautiful walking track on the lake side but this ignominious proposal will have traffic crossing the road at a busy intersection. There is already enough traffic to cause care when driving through and an increase will have major implications.

A tin shed between Lake Terrace and the lake is a proposal too far. It is a hideous idea and should be stopped dead in its tracks.

I am totally opposed to the proposal.

Hole in One submission

Towncentre Taupo Incorporated have surveyed our 533 members to gauge the feeling of the CBD community of the proposed amendment to the Reserve Management Plan and the expansion of the existing activity and its impact on the CBD environment.

We had an 11% response rate in the short timeframe following the survey, which is a fairly good response in our experience with this type of survey.

Of the respondents, 62.3% were in support of the proposal, so on behalf of the TCT board and its members, we submit in support. A few of the reasons behind the support include a feeling it will be a great addition to the Lakefront as an extension to the existing Taupo Town Centre Transformation project that will attract visitors into our CBD. With an already iconic tourism product on offer with the Hole in One activity in place, an upgrade to the existing infrastructure will tidy up this Lakefront area and further attract people to it. High quality attractions such as this are needed to keep our reputation high as a sought after destination town.

There were, however, some reservations from our members and the board around the precedent that such a decision might make with regard to further expansion of reserve land around our Moana. Whilst we encourage the expansion of this specific activity and location, we would not want this to open the door to other foreshore activities being granted licenses for expansion with infrastructure along our beautiful taonga that is Lake Taupo. There have been some concerns raised about the infringement on views of the lake and the impact that infrastructure may have on the Lakefront environment, so we encourage consideration to the look, feel and height of the infrastructure to ensure it blends in well with the surrounding environment and compliments the great work being undertaken in the adjoining TTCT project and the beautiful setting in which the proposal sits.

Feedback

Do you have feedback on any of the proposed options listed above?

I disagree with a permanent structure being built on the Lakefront Reserve. The reserve is for the use of all ratepayers and I believe a permanent structure will encourage other licence holders to apply for similar permanent structures which will obscure the natural views available to everyone.

The walk along Lake Terrace enables people to enjoy some of the most outstanding views in the world - Lake - Mountains etc. We don't need any buildings on the lakeside of this walkway.

To sanction this proposal would create a dangerous precedent to any further proposal for development. We value our town and what it has to offer now. Lets keep it that way.

Below is my submission to absolutely reject this (or any other) application, for a development on our Lakefront Reserve.

My understanding of Council property is that the lakefront is a 'Recreational/Scenic Reserve to be enjoyed by everyone.

To have a building erected in such a prominent position on the lake edge is against everything we are trying to achieve for Taupo as a destination. The public have enjoyed walking, cycling, picnicking and driving past the lakefront without impediment and it is my strong opinion that the Council should not have considered this application in the first instance.

The coffee and ice-cream carts, windsurfer tents and other vendors, would soon follow suit, making applications to set up their own buildings. If one is allowed, then why not more and within no time the lakefront will be taken over by commercial ventures, taking away the pleasure of actually seeing the Lake and beyond - which after all is the draw-card for tourists!!

To claim that a couple of people will be given work if this goes ahead is not a very convincing reason! Let's not lose sight of the fact that this is a commercial venture with all benefit going to the 'licence' owner! There are no other commercial ventures on the lake front and Hole in One Challenge should count their blessings that they are fortunate enough to already have a licence to opérateur in this prime position. They should be grateful for this and if the effort is too much to set up each day, then perhaps they should take their venture to somewhere that is permanent and does not violate 'the jewel that is Taupo's crown'.

The 'uninterrupted' beauty of Lake Taupō and the Mountains beyond are renown and I sincerely hope that Council will reject this proposed venture that would only spoil this drawcard that brings tourists and residents to Taupō. The Lake and environment beyond are - the Jewel in Taupō's Crown. Please - don't allow this to happen.

1. Major conflict of interest. TDC should not hear this application because they cannot be seen to be unbiased. I quote a Council press release dated 17 December 2021 regarding new Council offices "symbolising a true partnership between the Council and Tuwharetoa".
2. This change will effectively privatise public space in perpetuity.
3. Future stages are large scale commercial ventures that the public has to be shown now because they will obviously not fit into the footprint of Stage 1.
4. The encroachment onto public space and of the views down the Lake and mountains will be precedent setting and will be hard to stop once one application has been approved.
5. Other major structures already on public reserve include the Sea Scout Den and Lake Taupo Yacht Club. These are both community focused organisations that encourage involvement of young people in Taupo and in any even do not impede the view. Taupo Hole in One is clearly only a commercial venture for the applicants.

Is there anything else about the draft Reserve Management Plan you would like to comment on?

(You can view the strike through/underline version [HERE](#))

This draft appears to be a very generous reaction to an application by an entity that the Council by its own admission is in a "True Partnership" with.

Waikato Regional Council feedback on the Tapuaeharuru Bay Lakeshore Reserves Management Plan (Hole in One site) Review

1. Waikato Regional Council (WRC) recognises the preparation of management plans under the Reserves Act 1977 as an appropriate way to provide for continuity between legislative requirements, council plans and policies, and the day-to-day operation of a reserve.
2. We support the amendments to the policies and key actions related to areas now considered to be outside the scope of the management plan, i.e. Two Mile Bay Sailing and Watersports Centre.
3. We acknowledge that amendments regarding the expansion of the operations and duration of a lease fall within the scope of Reserves Management Plan. However, we note that the proposal to review the plan should be assessed against the Management Plan for Taupō Waters (in effect since August 2021). Similarly, we consider that further work is needed to ensure the proposal is consistent with Taupō District 2050 (District Growth Management Strategy).
 - a. Management Plan for Taupō Waters
WRC recommends carrying out further work to ensure that the proposed changes to the Reserves Management Plan are consistent with the Management Plan for Taupō Waters and the specific management outcomes of the latter. This assessment should pay particular attention to the High Court declaration in *Tūwharetoa Māori Trust Board v Taupō Waters Collective Limited* [2020] NZHC 1871.
 - b. Taupō District 2050
WRC notes that the proposal should be assessed for consistency with the growth management strategy for the district. We submit that the consultation documents and its supporting documents did not properly consider the impacts of the proposal on the future development patterns identified in this strategic document. Doing so will help the district identify if the proposal is consistent with the focus on consolidating retail and office activity within the Taupō town centre and the objective to minimise community costs.

Feedback

Do you have feedback on any of the proposed options listed above?

On behalf of the people of Ngāti Hinerau and Ngāti Hineure, we present this submission in response to the proposed Hole in One Development applications.

We confirm that along with our Tauhara hapū relations; Ngāti Hinerau and Ngāti Hineure hold mana o te whenua over the area where the proposed development will take place.

We request that:

- The developer engages Ngāti Hinerau and Ngāti Hineure via a hui at Waipāhīhī marae to present their proposal, receive feedback, clarify any queries we may have, and acknowledge our mana whenua over the area concerned.
- Ngāti Hinerau and Ngāti Hineure be given the opportunity to make oral submissions at the associated hearing where we will provide further feedback on the impact the proposed development may have on our cultural, customary, and economic rights.

14 March 2022

Gareth Green
Chief Executive Officer
Taupō District Council
Private Bag 2005
Taupo 3352

Dear Gareth

Re: Tapuaeharuru Bay Lakeshore Reserves Management Plan – Hole in One Site

Destination Great Lake Taupō has received and reviewed the documentation in relation to the proposed Taupō Moana Group Holdings Limited (TMGHL) development of the Hole-in One site.

Please find our submission below.

Destination Great Lake Taupō is the tourism promotion and marketing agency for the Taupō District; however, we have a growing role in the development and management of our destination to ensure our visitor economy enriches the lives of our people and place, and delivers positive outcomes across a range of social, cultural, economic, and environmental well beings.

We are currently working with iwi/hapu, government agencies and community stakeholders to develop a Destination Management Plan (DMP) for the wider Taupō District. This DMP will outline a shared statement of intent on the development and management of our region to ensure we create a 'Destination of Excellence' for our visitors, founded on the principles of manaakitanga and manaakiwhenua, protecting and enriching this place and its people for future generations.

In collating an evidential base to inform the DMP, a community survey was undertaken in August 2021. The key purpose of the survey was to gain a more informed understanding of the community's appetite for tourism and the visitor economy, now and into the future.

Results from almost 700 respondents¹ demonstrated that the Taupō community clearly understands the value of tourism to the economy and of the ensuing benefits that the sector delivers across the district. Approximately 90% of respondents agreed or strongly agreed that tourism is good for the region and 94% agreed or strongly agreed that tourism was an important contributor to the regional economy.

The community also recognised that the vibrancy, amenities, and infrastructure enjoyed by the region may not otherwise have been justified by the resident community and were partially attributable to strong tourism visitation.

Overwhelmingly, respondents commented on the need for a ‘quality’ vs ‘quantity’ approach and were in favour of further development and growth if it did not come at the expense of the environment or existing infrastructure upgrades. Over 50% of respondents indicated they are open to more tourism infrastructure in the region.

In addition to the survey, a comprehensive audit of our current tourism offering was also completed in July 2022. It provides an in-depth record of existing tourism product, infrastructure, and operator performance. This audit enables us to identify product gaps and opportunities for product development as well as highlighting where industry needs to build greater capability to deliver an exceptional visitor experience.

Product gaps identified include:

- Authentic Māori and cultural tourism products
- Health and wellness – spa, lakeside wellness product
- Luxury/boutique hotels
- Greater arts and non-adventure offering
- More wet weather activities
- More off-site function venues for the Business Events sector

In alignment with the principles and findings of our DMP work to date, Destination Great Lake Taupō supports the development of quality tourism product that will augment our product offering to fill identified gaps as outlined above. DGLT also supports the development and growth of new tourism product and infrastructure across the District as long as it recognises our collective role as kaitiaki of our land and people, and is underpinned by manaakitanga and manaakiwhenua principles which ensure the protection and regeneration of our taonga for the benefit of future generations.

Signed:

Dennis Christian

Would you like to present your submission in person at a hearing? *

I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

Feedback

Based on the proposal received from TMGHL, what further development would you like to see on the Hole in One site as outlined in Stage 1 and Stage 2?

NO further development of the site

Do you have feedback on any of the proposed options listed above?

This aberrant private commercial activity is proposed on publicly owned Taupo reserve land mainly used for open public access, recreation, public viewing and general public benefit. For many decades visionary Taupo administrators have continued to manage this lakeside public land in the public interest, free of large structures that impair lake views and lakeside access.

As a consequence Taupo's public lakeside land is generally environmentally 'natural', green and unique. Where else in the world can you find original beautiful predominantly green lakeside environments, not polluted by private and/or profit-motivated lakeside encroachment. There is appropriately zoned commercial land for commercial activity. Lakeside reserve land is not the place for large structures and subsequent expanding private commercial activity.

This proposal degrades the Taupo lakefront visually and goes against a long heritage of soundly managed lakeside reserves around Lake Taupo. This proposal is cheeky, it denigrates the special character of Taupo's beautifully established publicly accessed lakeside environment and all for what? Enhanced private profit from aberrant activity on public land.

I suggest that the most valuable public assets that TDC manages are its lakeside reserves, its major local and visitor attraction used all year round. Why would anyone want to kill/degrade the productive goose that lays the golden tourist eggs century after century?

Is there anything else about the draft Reserve Management Plan you would like to comment on?

(You can view the strike through/underline version [HERE](#))

I would suggest that this is not the only TDC reserve management policy document that TDC Governance is required to consider in regard to this proposal.

Please provide all governance and submitters with a full copy of the current TDC Reserves Encroachment Policy (or similarly named policy). From memory that policy was developed to prevent all private encroachment on to public usually reserve land.

I would suggest that this aberrant proposal on public Taupo reserve land may not have got as far as requiring public consultation, had people both inside and outside Taupo District Council been more aware of this current TDC reserves encroachment policy.

Feedback

Based on the proposal received from TMGHL, what further development would you like to see on the Hole in One site as outlined in Stage 1 and Stage 2?

NO further development of the site

Do you have feedback on any of the proposed options listed above?

Further development of the site is not needed given changes in tourism as a result of the loss of international visitors. Permanent buildings are not consistent with the purposes of the reserve.

There are toilets nearby, and numerous opportunities for purchase of refreshments at nearby cafes and restaurants. Taupō's appeal to visitors is, first and foremost, its setting in the central North Island volcanic plateau with relatively unobstructed views of the lake and mountains. We do not need additional built structures imposed on the natural landscape. With all additional structures whether permanent (e.g. Bungy and Swing on Spa Road) or relocatable (e.g. Steaming Bean coffee cart on Lake Terrace at the reserve) there is additional waste from litter which ultimately needs to be picked up by volunteers (see Tidy Taupō Facebook page) or council staff (a cost to ratepayers). Those businesses do not take full responsibility for their waste and, sadly, their customers also do not.

In addition, pedestrians and people on bikes will have to navigate their way around new structures. The reserve needs to be retained for non-commercial recreational purposes and its scenic values not further undermined.

Once one structure is erected there will be pressure and no grounds for restricting further structures. Yet the spectacular views draw far more people than any one business.

Finally, and perhaps most importantly, the proposed structure is too close to the black-billed gull population which needs protection

Feedback

Do you have feedback on any of the proposed options listed above?

We have been residents of Taupo for 38 years and very much enjoyed the view of the lake along the entire lake front on our almost daily walks. The current "Hole in One" setup, located at the end of a parking area, is OK, and not too much of an eyesore. However, we believe that expanding this development to the proposed significant large size is unacceptable, and we are totally against it.
